Troubleshooting

I don't always have an Internet connection available. How do I use product features, and can I access online content?
As long as you have activated your product by signing in with your Corel.com account, you have access to all main product features even if you are offline. In order to access some of the included software components, online features and content,
you must be online and authenticated. For best results, it's recommended that you access an Internet connection once a month for system updates.
If you are subscribing to CorelDRAW Graphics Suite you will be required to be online at least once every 30 days to re-authenticate your subscription.

How do I turn off popup ads in CorelDRAW?

To turn off the popup ads, go to Help > Message Settings. Uncheck one or both of the first two options for product related messages and updates, as you prefer. In the tray notifications drop-down list, select Do not show me tray messages for this application.

How do I change the language of the user interface and Help?

1. Click Tools > Options > Global.
2. Click General.
3. Choose a language from the User interface language list box. If you want to change the language of the user interface and Help when you start the application, enable the Ask me the next time the application starts check box.
4. Restart the application

If there is only one language available in the User interface language list box, you must first install the additional languages that you want. For more information, see "How do I modify or repair a CorelDRAW Graphics Suite installation?".

How do I modify or repair a CorelDRAW Graphics Suite installation?

1. Close all applications.
2. On the Windows Control Panel, click Uninstall a program.
3. Double-click the suite's name on the Uninstall or change a program page.
4. Enable the Modify option or the Repair option in the wizard that appears and follow the instructions.

Program features and utilities that are already installed may not appear in the wizard, or their check boxes may appear disabled. Product languages can be selected on the last page of the wizard.
Certain features, such as Copy installation files, cannot be added by modifying your installation
