CORSAIR iDisplay Stream Deck MK2 Universal Controller

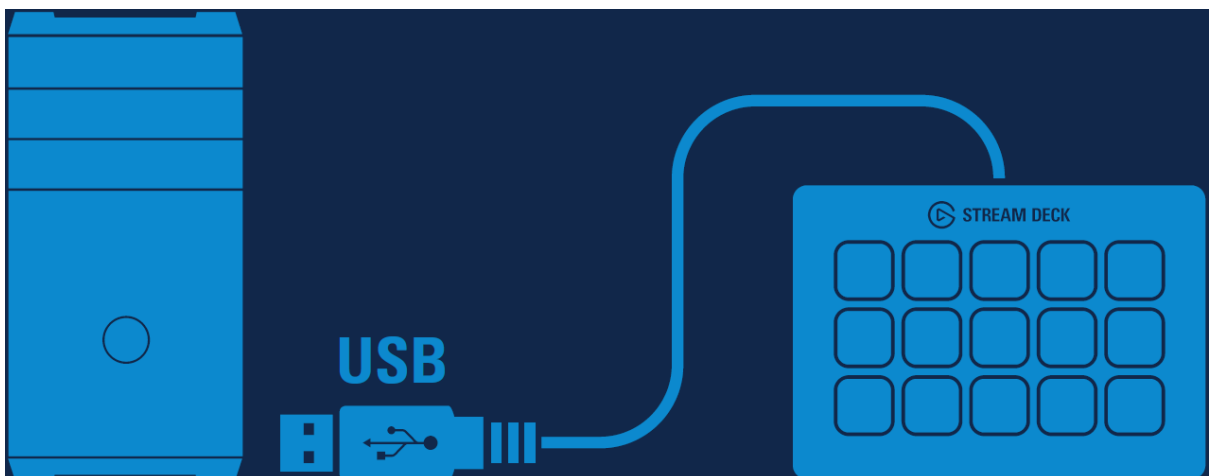

Quick Start Guide

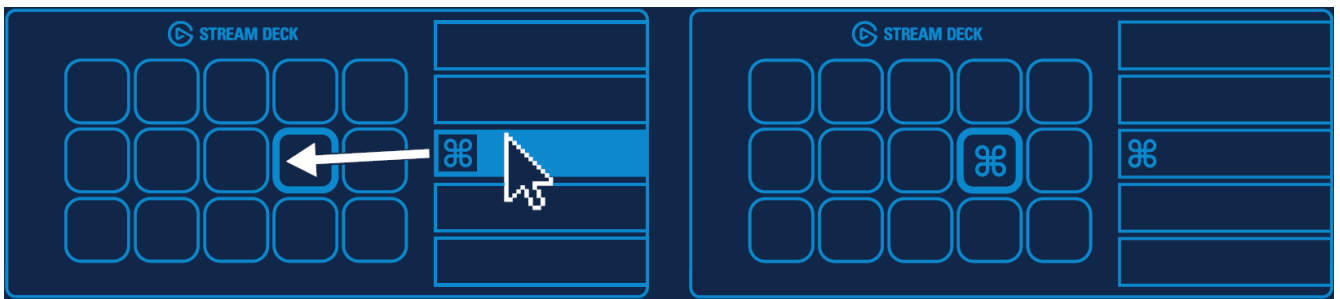

1. Download and install stream deck app.

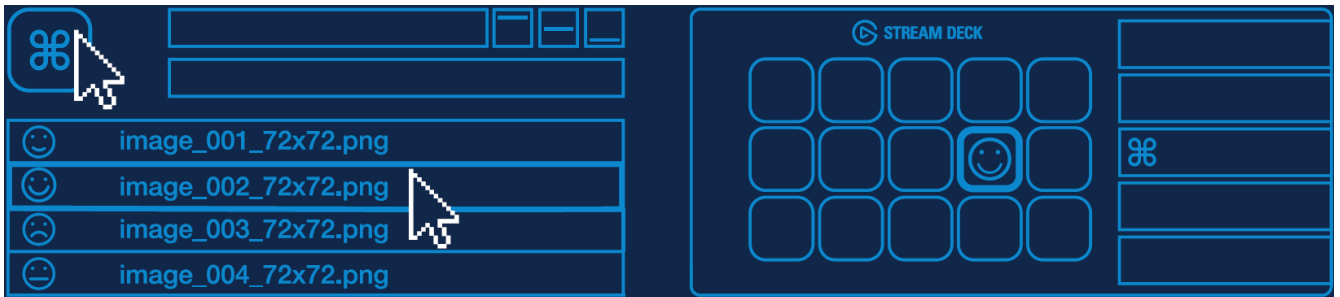

2. Connect stream that directly to a USB port on your PC or Mac – do not use USB hub.

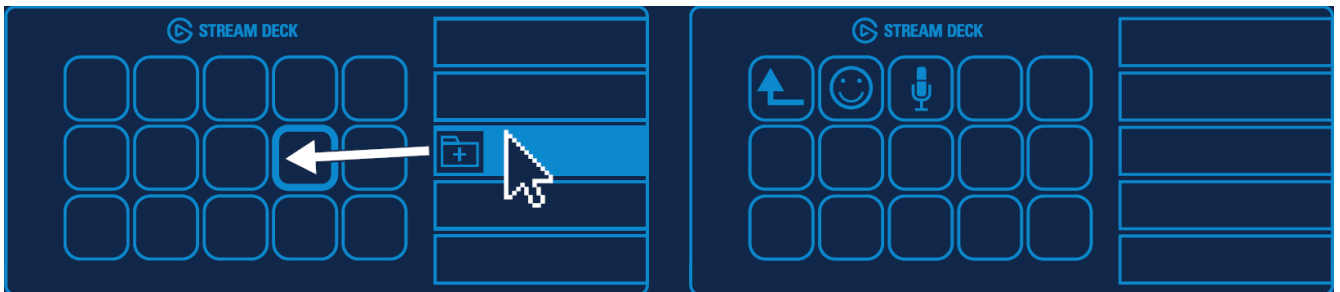

3. Launch the app to customize stream tactical stock drag actions from the right panel and drop them onto your decide keys on the left.

4. Configure your actions and personalized keys with custom icons – for best results use 72 x 72 pixels .jpg or .png files.

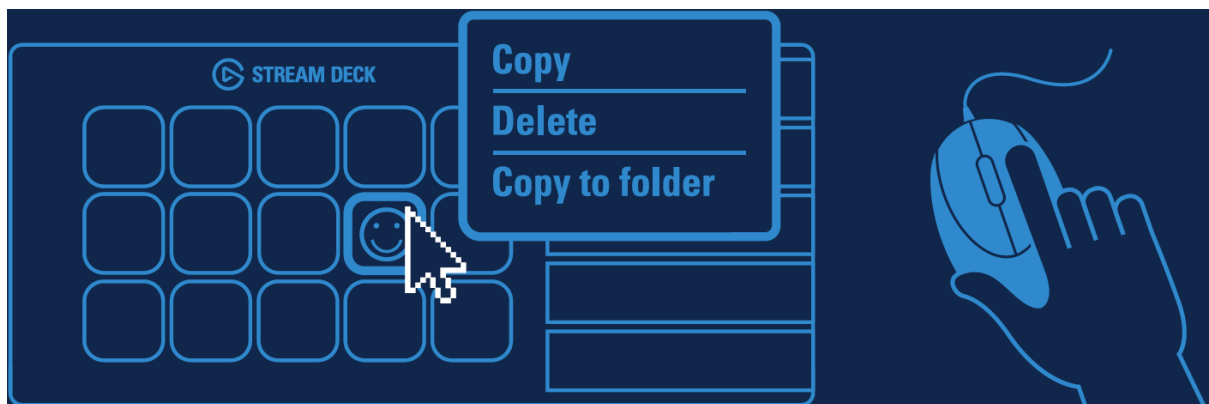

5. Drag and drop “create folder” on to key. Then drag and drop actions into that folder.

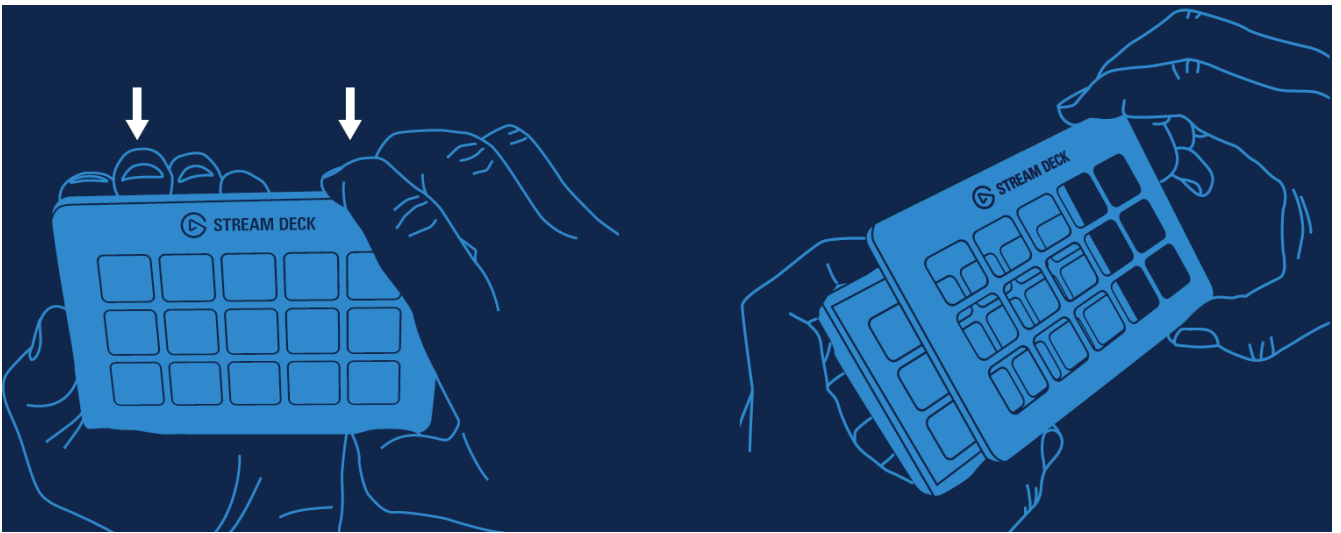

6. Tap the back key to exit a folder and return to your main configuration.

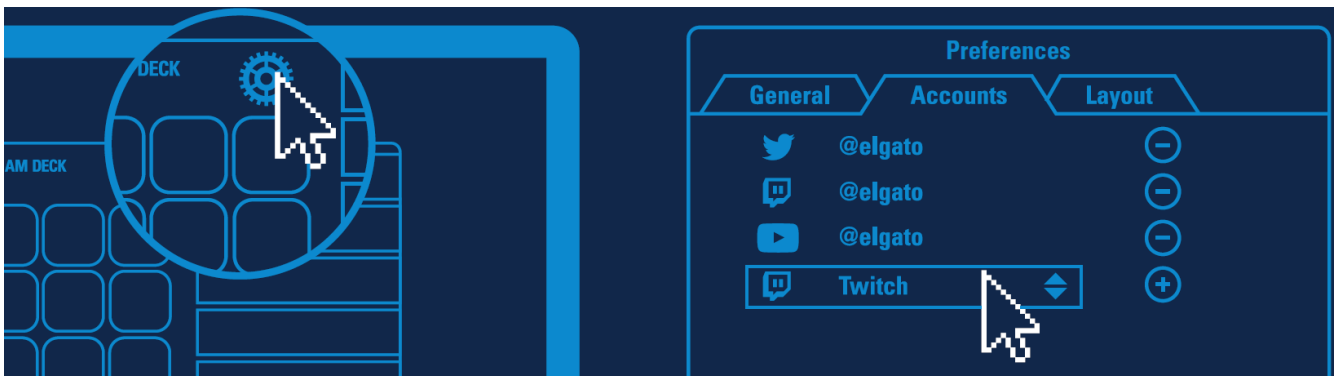

7. Right click keys to copy, delete or move them.

8. Faceplates can easily be switched out for custom designs.

9. Enter your social media accounts to connect with your fans.

10. Get tapping and Unleash your creative genius.
