a multi-channel speaker system. With Creative Multi Speaker Surround Sound, (CMSS®) you can enjoy stereo
music and movies in captivating surround sound*. CMSS has the ability to deliver rich 3D virtual surround sound
via headphones or a 2-speaker system, and multi-channel audio playback with 4.1, 5.1, or 7.1 speaker systems.
You can, however, choose to "upmix" the audio so that it is heard from all your surround speakers (if available).
To upmix audio to all your surround speakers:

1. Click Start > Programs / All Programs > Creative > Sound Blaster Audigy 5_Audigy Rx > Sound Blaster Audigy

    5_Rx Control Panel

2. Click on the CMSS 3D option to enable CMSS 3D Surround
