Know your Lock:

1. Numeric Keypad
2. Micro-USB Access Port
3. Metal Outer Casing

Note:

1. The 4 AAA alkaline batteries are not included.
2. With the supplied Micro-USB cable, plug one end into the lock charging port and adequate power supply. Enter 123456+0K button to open the door to install the batteries before getting started.
3. After the lock box is configured, the initial password 123456 will be invalid and needs to be modified in the

password settings within the App.

4. The lock requires a network connection to set passwords, view records and remove devices.

5. The additional family members are set up as administrators, with all permissions to set and modify passwords, share devices, and view records. Other members who join the group via invitations are ordinary users and have limited access to unlock via mobile phone or the passwords shared by the administrator.
