Important Information

Please note the information contained in these Instructions and save this manual.
Technical data: 220-240V AC, see fixture label!

1. Electrical appliances must only be connected professional person.
2. Important! Before commencing installation work disconnect the main cable from the power supply-remove fuse or put switch to "OFF".
3. Indoor Lighting: This lamp is suitable only for living accommodation premises and not for areas in which moisture-proofing is required. The light may only be installed out of range of the shower head. Refer to your national electrical safety standards and requirements to establish exactly where it is safe and legal to install the lighting fixture.
4. Lighting elements and transformers reach high temperatures when in operation: improper use can lead to a fire hazard and the change of the bulbs can lead to injuries!(cool down)
5. Lamps which carry the  symbol are suitable for installing on materials with normal combustibility. If the lamp does not carry the  symbol it must not be installed on materials with normal combustibility. The temperature constancy of the fastening area must withstand at least 90 deg.C.
6. Before using the the lamp, make sure that the bulbs sit properly.
7. Warning:halogen bulbs overheat, keep them far enough from easily flammable materials (for instance curtains)
8. If the external flexible cable or cord of this luminaire is damage, it shall be exclusively replaced by the manufacture or his service agent or similar qualified person in order avoid a hazard.
9. When cleaning the lamps, make sure that the connection elements and conductive parts do not become damp.

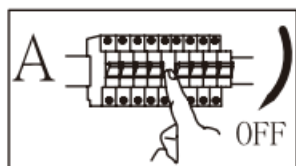

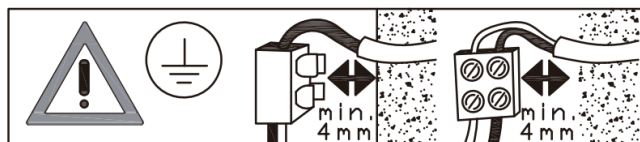

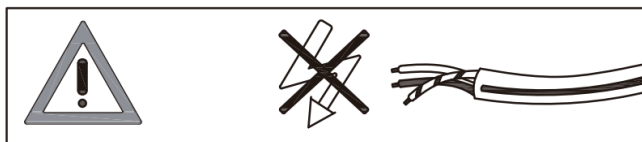

Subject to technical modification

Explanation of Safety Classes

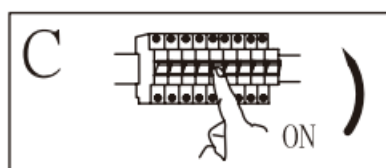

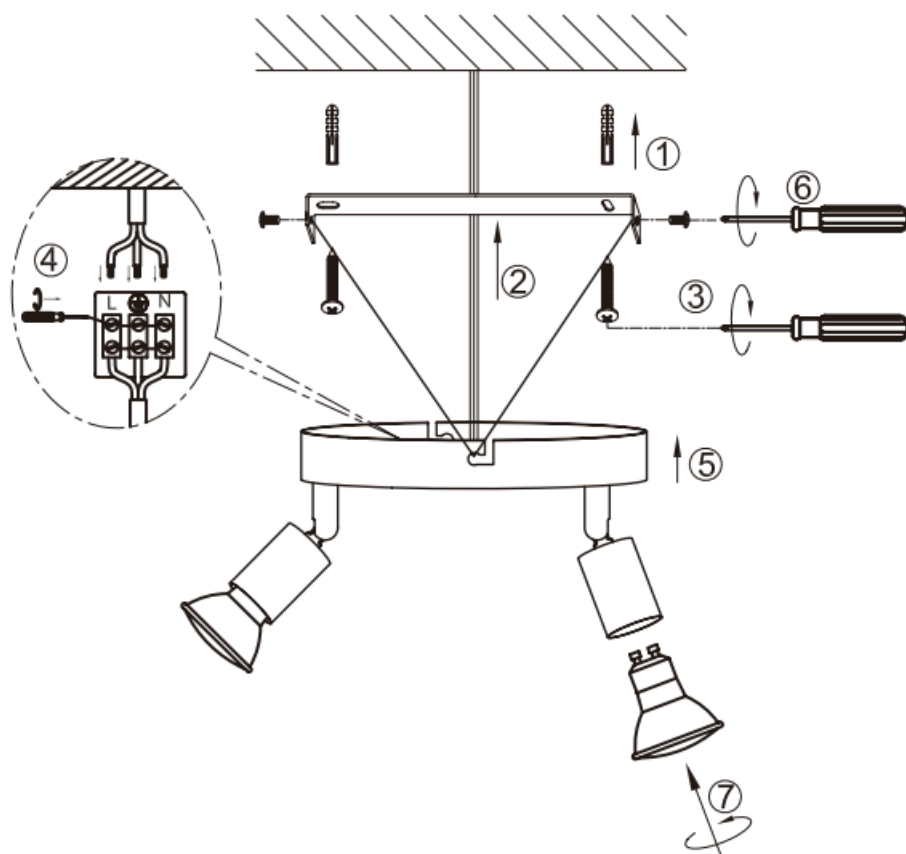

= Protection class I. This lamp has an earth terminal. The earth wire (yellow and green) must be connected to the terminal indicated by the symbol .
