Instruction Code Guide

1. Set the Monitoring Site and Auto Tracking

   First of all, select the location to be monitored, then enter 99 and click "Setting" to set the monitoring site. The camera will automatically return to this location after completing the tracking.
   Enter 100 in the preset site and click "transfer" to turn ON smart tracking. When the camera detects that someone is passing in the surveillance area, the camera will automatically track the person's movement until the person leaves the whole monitoring range of the camera. (Note: you must set the monitoring site before turning on the auto tracking.)
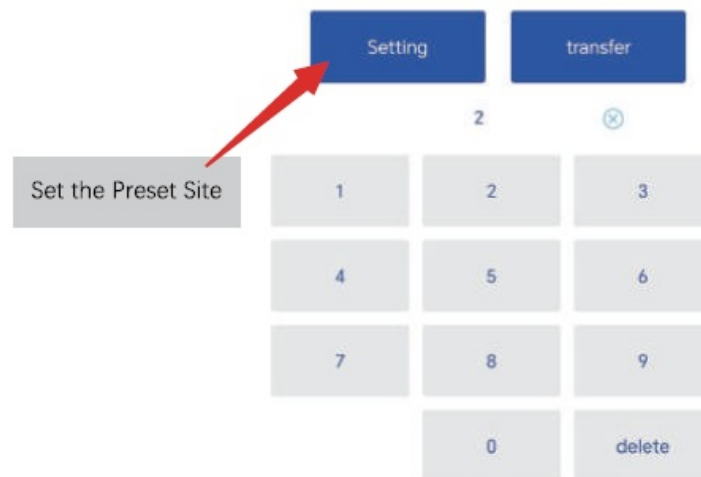

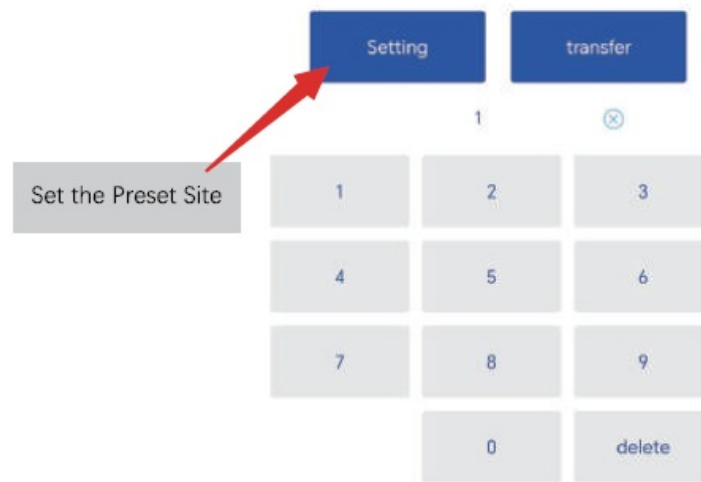

① Set the Monitoring Site

② Turn ON Auto Tracking

Turn OFF Auto Tracking: If you need to turn off auto tracking, enter 103 and click "transfer".
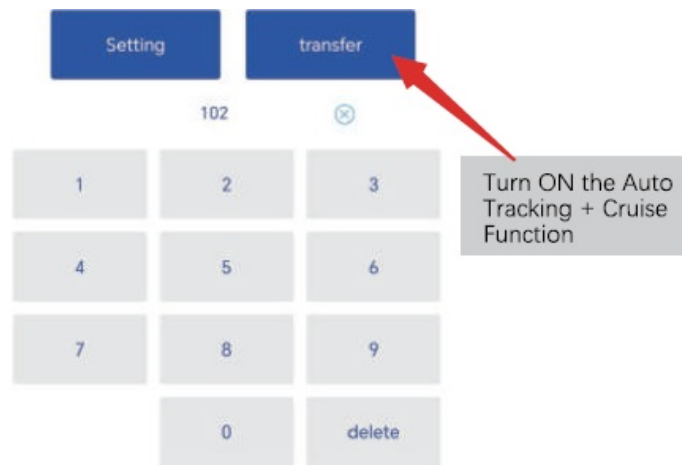

2. Setting Preset Sites and Auto Zoom Cruise

Set multiple zoomable monitoring sites as preset sites 1,2…(30 preset sites). When you need to monitor one of the positions, directly call its corresponding preset sites and the camera will automatically go to the preset position. When the 98 command is entered, the camera will zoom in according to the preset position and the zoom magnification you set: preset 1, preset 2… Cruise in sequence. Manually slide the APP screen to stop the cruise. (Note: fixed focus camera does not have zoom function.) Patrol: Corresponding to No. 1–30 preset sites, enter 98 and press "transfer" to open.

3. Set the Auto Tracking + Cruise Function

After setting the preset site you want to monitor, enter 102 and click "transfer" to open the Auto Tracking + Cruising function, and the device starts cruising. When someone appears in the monitoring screen, cruising pauses, the camera automatically tracks the movement of people until the target disappears, then the device continues to cruise.

Turn OFF Auto Tracking+ Cruise Function: If you need to turn off auto tracking, enter 103 and click "transfer". (Note: After opening the tracking cruise function, you must call this command to close this cruise.)
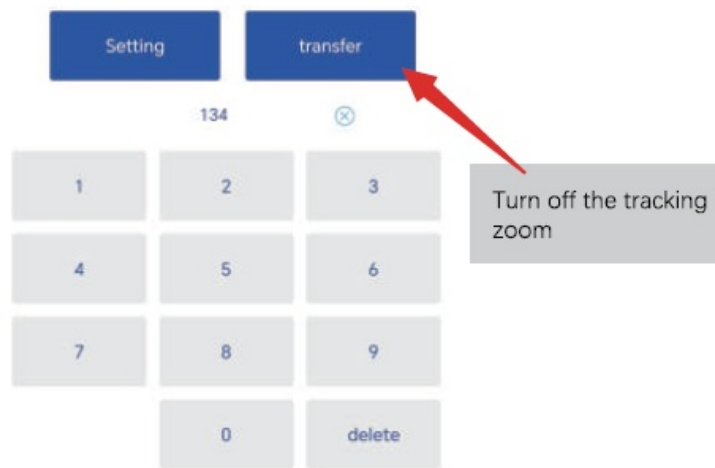

4. Clear the Preset Site to the Default Value

   If you need to clear the preset, reset the preset or restore all commands, enter 104 in the app screen preset and click "transfer". Clearing the preset site to the default value will not affect the normal WiFi connection of the camera.

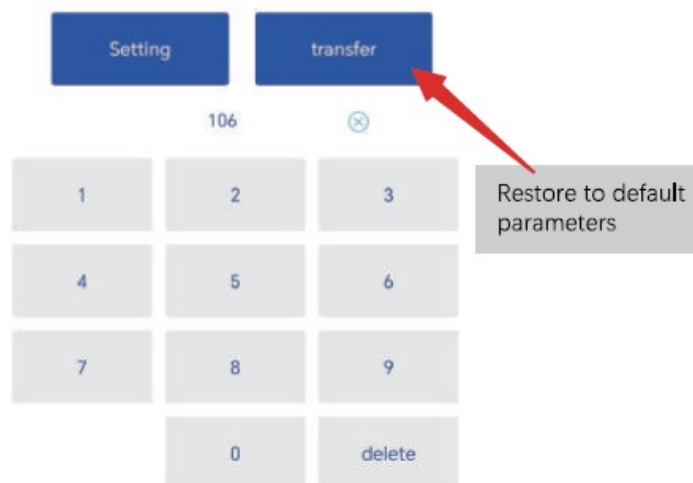

Zoom Function Settings

1. Turn off the tracking zoom

   After the camera detects a human figure and starts to track it, the device will automatically zoom in to adjust the distance of the lens, so that the picture can be viewed and recorded more clearly. This function is enabled by default. If you do not need it, you can enter 134 in the preset position.click "transfer" to close it.

Turn off the tracking zoom

Restore to default parameters

If you have set multiple command functions and need to clear all settings, you can enter 106 in the preset position and click "transfer" to restore all command functions to the default parameters.

Restore to default parameters
