cudy RE3000 AX3000 WiFi 6 Mesh Repeater

Product Information

Specifications

- Model Number: 810600194
- Supported Languages: English, Italiano, Magyar, Deutsch, Eesti, Norsk, Svenska, Ting Vit, Cestina, Suomi, Hrvatski, Dansk, Lietuvi kalba

Product Usage Instructions

Step 1: Plug in the Extender
Plug the extender into the socket near your router and wait for it to boot up.

Step 2: Pair with Your Router

- **Method A:** Press the WPS buttons on your router and then on the extender. Wait for the LED to light up.
- **Method B:** Connect your computer or phone to the extender's Wi-Fi and set it up in your browser by following the steps shown in the pictures.

Frequently Asked Questions (FAQ)

- **Q: How do I know if the extender is properly paired with my router?**
  A: When the LED on the extender lights up after following either Method A or B, it indicates a successful pairing.
- **Q: What should I do if the LED does not light up after pairing?**

A: In such cases, ensure that the extender is correctly plugged in and try the pairing process again.

- **Q: Can I change the Wi-Fi network name of the extender?**
  A: Yes, you can typically change the Wi-Fi network name and password of the extender through its browser-based setup interface.

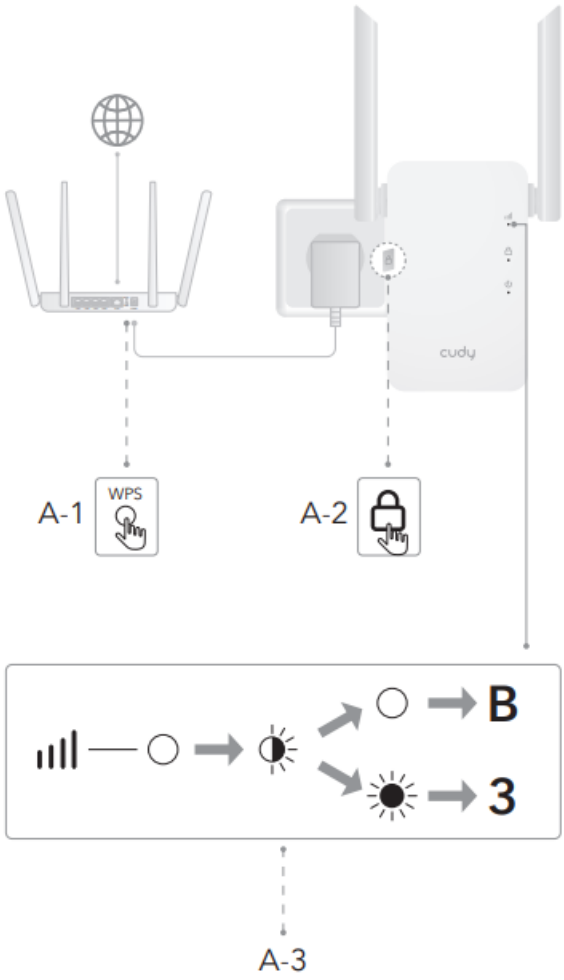
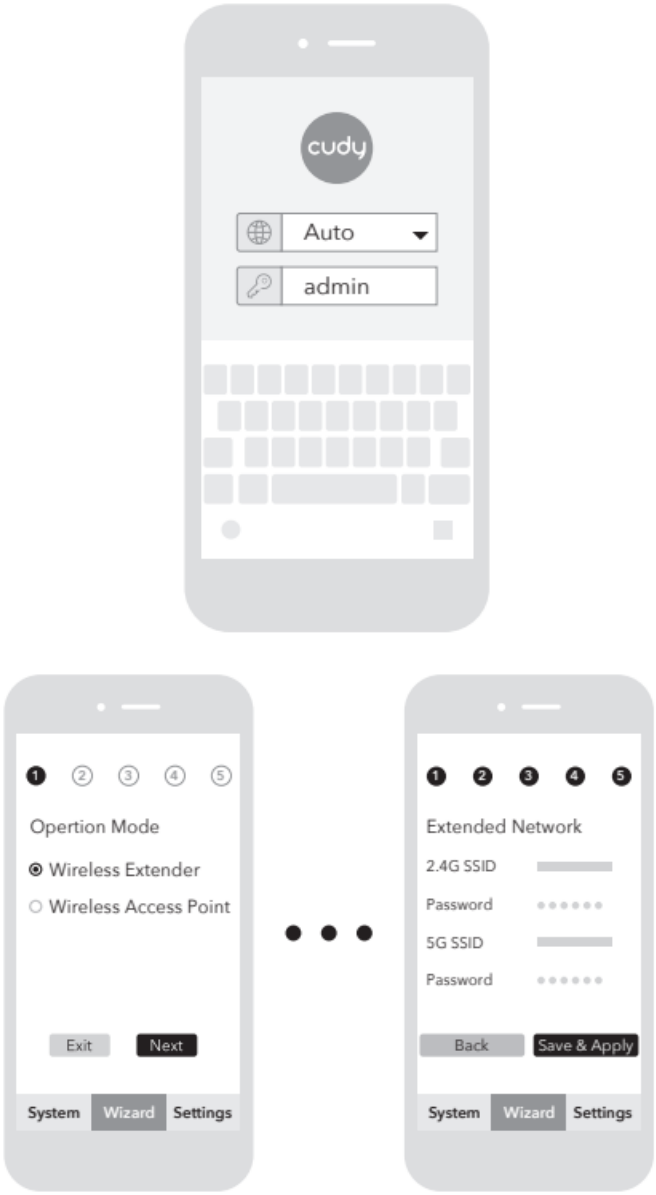
2

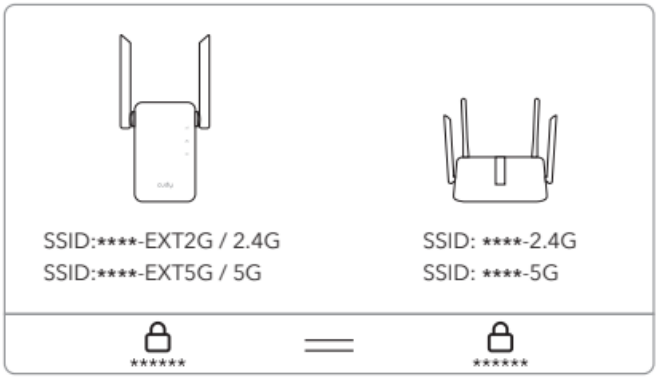
A



B



3. Connect your device to the extended Wi-Fi and try accessing the Internet. By default, the password for the extended network will be the same as the original network.



Note: If you paired the extender with a “Cudy Mesh” device by pressing the WPS buttons, the Wi-Fi name will be the same as the original Wi-Fi.

4. Relocate the extender between the Wi-Fi coverage area and the area where you want to expand the Wi-Fi signal.
