Cudy WR1300 Wi-Fi Mesh Router Instruction Manual

Cudy WR1300 Wi-Fi Mesh Router

Product Information

Specifications

- **Power adapter**: Included
- **Internet connection**: Ethernet cable or DSL/Cable/Satellite modem
- **Wireless connectivity**: Wi-Fi
- **Web management page**: http://cudy.net/

Product Usage Instructions

Step 1: Hardware Connection
If your internet connection is through an ethernet cable directly from the wall instead of through a DSL/Cable/Satellite modem

1. Connect the ethernet cable to the router's WAN port.
2. Skip steps 2 and 3.

If your internet connection is through a DSL/Cable/Satellite modem

1. Connect the power adapter to the router.

2. Connect the modem to the router's WAN port.

Step 2: Computer Connection
Choose one of the following methods to connect your computer to the router

- **Wired Connection:** Turn off the Wi-Fi on your computer and connect it to the router's LAN port via an ethernet cable.
- **Wireless Connection:** Connect your device to the router's Wi-Fi using the SSID (network name) and Password printed on the bottom of the router.

Step 3: Router Configuration

1. Launch a web browser.
2. Enter **http://cudy.net/** or http://192.168.10.1/ in the address bar.
3. Use "admin" as the password to log in.

Step 4: Internet Connection Setup
Follow the step-by-step instructions in the window to set up the internet connection.

FAQ

1. **Q1: What can I do if the login window does not appear?**
   A1: Disable the VPN service you are using on your PC or Mobile phone.
   A2: If the computer is set to a static IP address, change its settings to obtain an IP address and DNS server address automatically.
   A3: Verify that **http://cudy.net/** or 192.168.10.1 is correctly entered in the web browser.
   A4: Use another web browser and try again.
   A5: Reboot your router and try again.
   A6: Disable and then enable the network adapter being used.
2. **Q2: What should I do if I cannot find Wi-Fi signal?**
   A: Please make sure the router is connected, power, and broadband interface has no loose connections. If everything is normal but still no signal, try using a computer to set up or restore the router to factory settings. If after restoring factory settings there is still no signal, restart the router. If the issue persists, it may indicate a fault with the router.
3. **Q3: How to Reset to defaults?**
   A: While the power is still on, keep pressing the reset button for 6 seconds, and wait for 1-2 minutes for the router to restore to factory settings.
4. **Q4: Why can't my phone enter the Setting Page of Router?**
   A: Please make sure your phone is connected to the Cudy Router Wi-Fi (default name is printed on the bottom of the router), and ensure you enter the correct site in the browser. (Please follow instructions FAQ -> Q1)
