**cudy WR300 Multi Mode WiFi Router**

## Product Information

### Specifications

- **Model:** 810600216
- **Power System Indicator:** LED
- **WAN Port:** Ethernet
- **Network Protocol:** Wi-Fi

### Product Instructions

- Connect the power adapter to the router and wait for the Power system indicator light to turn solid on.
- Connect the router's WAN port to the DSL/Cable Modem or the Ethernet wall outlet.
- Connect the router via Wi-Fi by following method A or B:
- Connect your device to the router's Wi-Fi network. The default network name/SSID and Password are printed on the bottom of the router.
- Consult the user manual for detailed instructions on alternative connection methods.

### FAQ

- **Q:** Where can I find additional technical support?
- **A:** For further technical assistance, visit [www.cudy.com/support](http://www.cudy.com/support) or contact [support@cudy.com](mailto:support@cudy.com).
- **Q:** What should I do if the Power system indicator light does not turn on?
- **A:** Check the power connection and ensure that the power adapter is properly plugged into the router and a working power source.

### Usage Instructions

1. Connect the power adapter to the router and wait for the Power system indicator light to turn solid on.

2. Connect the router's WAN port to DSL/Cable Modem or the Ethernet wall outlet.

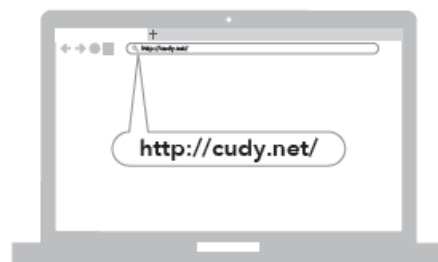

3. Connect the router via A or B method.

- **A Wi-Fi:** Connect your device to the router's Wi-Fi.  
(the default network name/SSID and Password are printed on the bottom of the router.)  
Flip the page to continue...
- **B Wired:** Turn off the Wi-Fi on your device and connect it to the router's LAN port via an Ethernet cable.
- Open a browser and follow the pictures to configure the router.
