Current Snap DS

For those who don't have time to screw around Tetra@Snap DS — our most innovative cabinet sign solution ever. Snap is a double-sided module that snaps into a screwless aluminum extrusion, allowing module spacing and brightness levels to be customized on-the-fly. Tetra@Snap DS is a one-size-fits-all product for double-sided cabinet signs. Say goodbye to stocking dozens of sticks. Say hello to Tetra@Snap DS.

Bright as a new penny

Tetra@ Snap DS modules pump out 400 lumens each, and can be installed at three different spacings, for a maximum 1000 lumens per foot. No other cabinet sign product comes close.

Load 'em up

Load 33 Tetra@ Snap DS modules per 100W power supply, enough to light a single 64" x 80" sign.

One product to rule them all

The most flexible product on the market, Tetra@ Snap DS is suitable for cabinets ranging from 10" to well over 36" in depth, all with the same material. You may be wondering what the catch is. But it only gets better. Here's how to install Snap:

1. **Step 1:** Snap modules into extrusion.
2. **Step 2:** Install extrusion into sign.
3. **Step 3:** Plug in. Enjoy results.

No catch. Tetra® Snap.

Tetra® Snap DS Features

- Wide 170° beam angle
- **Efficacy:** 153 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- 10-year limited warranty

Spacing Guidelines

	Depth	Max stroke
Double sided	10" – <12" (254 mm – <305 mm)	13" (330 mm)
	12" – <14" (305 mm <356 mm)	16" (406 mm)
	14" – <16" (356 mm – <406 mm)	18" (457 mm)
	>16" (>406 mm)	20" (508 mm)

Brightness Chart

Our Brightness Chart provides a clear explanation of the light levels you can achieve using the same Tetra Snap modules and rail, as well as your customer's predicted* happiness levels. Happiness levels estimated by our proprietary artificial intelligence algorithm Marketing manager

Brightness level	Lumens per foot	Your inventory level	Your customer's happiness
Regular output	600	Low	☹
High output	750	Still low	☹ ☹
Ludicrous mode	1000	Yup, still low	☹ ☹ ☹
