CYBER SCIENCES SER-32e CyTime Sequence Events Recorder

FIRMWARE DOCUMENTATION

APPLICABLE PRODUCTS

This document contains information about updating firmware to the latest released versions for the CyTimeTM Sequence of Events Recorder, model SER-32e from Cyber Sciences. The information applies to the following catalog number:

SER-32e

Note: Updating firmware does not affect user-configured settings. However, be sure to upload all events prior to the update.

FIRMWARE REVISION HISTORY

• To determine the latest SER firmware release or to view complete details on firmware history, please refer to CyTime SER-32e Release Notes.

Note: Do not attempt to "downgrade" firmware to a previous version; this can cause the unit to malfunction.

UPDATE INSTRUCTIONS

CyTime SER-32e firmware can be updated over a network. First download the latest firmware update (.zip file) from the Cyber Sciences website (<u>www.cyber-sciences.com/downloads</u>) and extract all files.

Connect a PC to the CyTime SER using a standard Ethernet cable and establish communications through the onboard software UI. It is also possible to update firmware over a local area network. In either case, ensure that reliable control power is maintained to the CyTime SER during the entire update process. A loss of communication during the update could cause the unit to malfunction.

UPDATE PROCESS OVERVIEW:

- 1. EXTRACT firmware update zip.
- 2. LOGIN to SER-32e software UI.
- 3. NAVIGATE to Setup > Administration

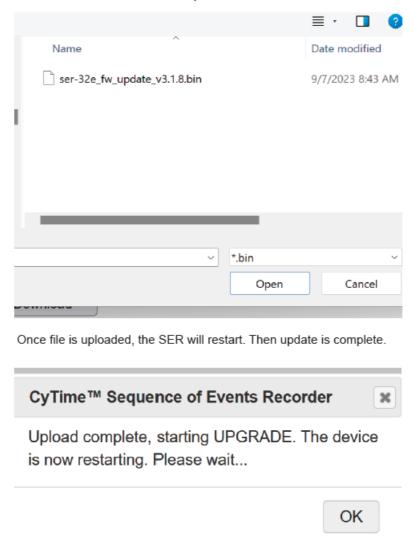

4.

5.

UPDATE select file and update.

UPDATE: Select .bin file from .zip download.
