cybex e-Priam Jeremy Scott Stroller

Product Usage Instructions

- Locate the Product ID/Catalog Number on the Product:
- The Product ID is printed directly on the product.
- Check the label on the car seat, stroller, or accessory.
- Find the Product ID on the CYBEX Online Shop:
- Go to the website and navigate to the product you purchased or are looking to purchase.
- Select the color of the product you would like to look up.
- Go to the Product Details section and copy the Product Code.
- Go to the Law Label Lookup page:
- In the search field, enter the product ID you found (either on the product or from the online shop), and click Search.
- The lookup tool will display detailed information about the product's label, including materials and compliance with safety standards.
- Ensure the product meets safety and legal requirements, including state-specific regulations.

FAQ

- Q: What if I cannot find the Product ID/Catalog Number?
- A: If you have trouble locating the Product ID, contact customer support for assistance.
- Q: Can I use the Law Label Lookup tool for products from other manufacturers?
- A: The Law Label Lookup tool is specifically designed for products from Global RS Inc. It may not work for

other manufacturers.

Troubleshooting

| Indicator lights | Description |
|------------------|-----------------------------------------------------------------------------------------|
| | Only the red light flashes. |
| | Red light is flashing and the LED spot next to the red light sh ines white permanently. |

| Meaning | Actions |
|------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| The battery is empty. The stroller will decelerate perma nently. | Please turn off the Priam & charge the battery! |
| No signal from the handlebar. Support is not working a nymore. | Please fold & unfold the stroller. If the LED status rema ins the same please get in touch with your retailer! |

| Indicator lights | Description |
|------------------|------------------------------------------------------------------------------|
| | The red light is flashing and all 4 white LED spots are shining permanently. |

| Meaning | Actions |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Error in the calibration of the handlebar sensors. Support is not working anymore. | Please activate the foot brake and turn off the Priam. Remove the weight on the handlebar and do not hold the handlebar. Now turn on the ePriam again. If the LED status remains the same please get in touch with your retailer. |
