PRODUCT FANCTION

PRODUCT PARAMETERS

Products model : KT-SCO2

Products name : Multi-function wireless charger socket

Input: 100-240V~ 50/60Hz

Max Power : 2500W

Max current : 10A

Wireless output : 5W/7.5W/10W/15W

Products dimension : 170 × 170mm

Type C output : 5V/9V/12V/15V 3A/20V 2.25A

USB output : single usb, 5V 3.6A/9V 2.5A/12V 2.25A double usb, 5V 4.8A

Charging distance : 4-9mm

PRODUCT CHARACTERISTICS

ANTI-ELECTRIC SHOCK, MULTIPLE ANTI-ELECTRIC SHOCK SAFETY DESIGN

Jack design, structural design of impact-resistant housing, enhanced safety mating distance Multiple safety design such as design can effectively prevent electric shock accidents;

PREVENT FROM BURNING, REDUCE THE FIRE HIDDEN DANGER

Internal and external plastic parts are all flame-retardant engineering plastic, reduce fire hazards;

PLUG-IN RESISTANCE

NORMAL MATING AND DURABLE WITHOUT LOOSENING

High-quality copper sheet with insert sleeve meshing technology, strong elasticity, proper meshing and less heat generation Normal mating is durable and does not loosen.

PRECAUTIONS

Keep the product dry. Rain, humidity, and various water and possibly minerals can corrode circuits. If the device is wet, dry the device as soon as possible, you can wipe it with a clean soft cloth

Do not attempt to charge the device when the product case is damaged, do not use it incorrectly Charger to power the product

Do not try to open the product, unauthorized removal will damage the product

Do not throw, knock, or hit the device, as this will damage the internal circuits and mechanical structure

WIRELESS CHARGING

Instant charging and charging frequency is stable, fast charging with mobile phone case is not affected at all

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's

authority to operate the equipment. Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
