**CYSSJF K-999 Wireless Queue Calling System Restaurant Pager**

## Product Information

### Specifications

- **Model:** K-999+K-Q13
- **Function:** Voice Setting

### Description

The K-999+K-Q13 is a keypad and display system that allows users to connect the keypad to the display and adjust the E1 Voice Modeprompt voice. It offers various functions that can be explored in another manual.

This is a simple manual to teach you how to connect the keypad to display and adjust the prompt voice you need. More functions can be known from another manual.

When you get this system, just plug in and then press any number + ENT key on the keypad, the displays will show this number with prompt voice. Common Voice Mode:

- Press 5+ENT on the keypad, the displays will broadcast like this:  
Please number five go to counter (F6-E1-2)
- Press 5+F2 or F3 or F4, and the displays will broadcast like this:  
Number Five (F6-E1-3)
- Press 5+ENT or F2 or F3 or F4, the displays will prompt by dingdong sound (F6-E1-4)
- Press 5+F1, number 005 will be canceled from the display.

Change the service type from “counter” to “room” or “office”, just go to F8-E2 to set

**Note:** Can adjust the volume directly by the UP/DOWN key when the displays in standby

## Brief Introduction of K-999 Keypad

Install the antenna before using, can enhance the signal distance.

### **LAST**

Call the previous number, for example, the current calling number is 009, it will call 008 when you press the LAST key.

### **DIGIT**

Can set keypad in 3-digit or 4-digit (hold down to switch)

### **ON/OFF**

Turn ON/OFF the keypad easily.

### **ZONE**

Hold down for 5 seconds to change zone data. Can choose the zone from A and 0-9, for example, if you want all signals to work in zone 8, just need to adjust to "8" on the keypad. Then enter to F7-E1 function on the display receiver, and choose "8" or "ON", "ON" means the displays can receive the signal from all zones. After pairing, press any number on the keypad to call, this number will show on the displays with clear voice prompting

### **F1**

1. **Short press:** Number + F1 = Cancel this number from the displays
2. **Long press:** Have 3 modes—none dot, 2 dots, 3 dots (hold down to switch)

#### **None dot:**

This mode is selected by default when only one keyboard is available.

#### **dots:**

Two or more keypads of the same zone work together. For example, two keypads is in the same zone, when the first keypad calls number 005, just need to press the NEXT key on the second keypad, it will skip to 006, then press ENT to call number 006.

#### **dots:**

Whichever zone is chosen, two or more keyboards can interact together. For example, if there are 4 keypads, you can set those keypads in zone 1/2/3/4 or 1/2/2/3, then press the NEXT/LAST key on each keypad to call, and the number will be called one by one. Note: please choose the "ON" on the displays' F7-E1 function if want to let the keypad in a different zone.

### **NEXT**

This key can call the customer one by one, it has 2 situations:

1. Single counter e.g.: Start Calling from NO.001, it will skip to 002 if press "NEXT", then 003, 004, 005.....
2. Multiple counters e.g.: Counter 1 call the NO. 001, it will skip to 002 if counter 2 presses the "NEXT" key.....

**Note:** This function is applicable in F1-3 dots cases.

Hold down the "F1" key for 5 seconds to check whether to open the "zone function" or not.

When you see the small red dot displayed in the bottom right corner of the last two/three digits, it means OPEN.

Default this function is turned off, so will not show a small red dot.

### **F2-F3-F4-ENT:**

**CALL function:** Number + F2 or F3 or F4 or ENT are all call functions. The default is to simply press the "Number + ENT" to call.

0 KEY

Hold down the “0” key for 3 seconds, can turn on/off the operate sound.
