Introduction

Keeping your instrument safe and playable has never been easier, thanks to D'Addario Humidipak. Using

Boveda's patented two-way humidity control technology, Humidipak automatically adds or depletes moisture to maintain the ideal humidity level of 45-50% RH inside your instrument case, and eliminates the guesswork and anxiety of maintaining your instrument.

Best of all, using Humidipak is easy. No more dripping sponges or manual adjustments. Simply place the humidification packets with the included pouches into your instrument case, close the lid and relax, knowing your instrument is safe and sound.

Humidipak Maintain is a humidification device and not intended for use in constant high humidity environments.

9 DIXSIDIO

HUMIDIPAK
Two way humidification system

Thanks to your Humidipak and Dixsidio Two Way Humidification System, your Dixsidio guitar has never been so stable, thanks to 24 Karat Gold Humidipak, being a precious metal, it doesn't expand or contract, allowing Dixsidio guitars to stay always constant in humidity. Therefore, Humidipak will allow you to avoid the problems of wood expansion and contraction, so it will make your instrument safe, and eliminate the pain and worry accompanying your instrument.

Best of all, using the Humidipak is easy. The new Humidipak operates on an all-clip-on basis. Simply place the two-dimensional pads onto the neck and body of your instrument. No need to use glue or wax, knowing that the material is safe and sound.

Humidipak Material is a special ultra-thin material used for use in constant high-humidity conditions.

1. Place single pad on the back of the neck
2. Place single pad on the back of the body
3. Place single pad on the back of the body
