MICRO UNIVERSAL TUNER

This feature-packed precision tuner with limitless positioning options features a full-color display with four selectable viewing angles (2 vertical, 2 horizontal) in an attractive, compact design. The advanced tuning algorithms allow you to tune in noisy environments, while the dual-swivel clip allows for virtually any positioning for a clear view of the easy-to-read display. The retractable swivel arm also allows the tuner to be folded down, so it's out of the way when not in use. The Micro Universal Tuner is the compact, convenient and accurate tuner for every instrument in your collection.

Vertical View

Horizontal View

Orientation Button:
Scroll through four viewing angles.

Cursor Buttons:
Adjust tuner calibration from 410 to 480Hz.

Power Button: Toggle tuner on and off. Tuner automatically powers off after 10 minutes.

MICRO UNIVERSAL TUNER

The feature-packed precision knee with limitless positioning options allows a full-color display with four selectable viewing angles. The 12" x 14" x 16" keyboard is an attractive, ergonomic design that's advanced to fitting algorithms, allowing you to turn, raise, lower, rotate, and slide the keyboard. The 10" x 10" clip allows for virtually any positioning for a clear view of the map to road display. The 10" x 10" clip mount also showcases the knee to be folded down, so it's out of the way when not in use. The Micro Universal Tuner is the compact, convenient and accurate tuner for every instrument in your collection.

Orientation Buttons: Scroll through four viewing angles.
 Center Buttons: Adjust mirror vertically from 410 to 430mm.
 Power Buttons: Toggle mirror on and off. No automatically power off after 10 minutes.
