D-Link

D-Link 5/8-Port Desktop Ethernet Switch

PRODUCT SETUP

Step 1

Plug the supplied power adapter into the Switch and the other end into a power outlet, power strip, or surge protector (recommended). Verify the Power indicator is lit on the Switch.

Step 2

If your switch will be uplinking to your existing gateway/router/firewall, connect another Ethernet cable from your gateway/router/firewall LAN port to an available port on your switch.

Step 3

Connect one end of an Ethernet cable into the device you want to connect to the Switch and the other end into one of the Ethernet ports on the Switch. Check the Link lights (LEDs) on the Switch to verify a proper connection.

Technical Support

You can find software updates and user documentation on the D-Link website.
