**CONNECT AND ADD SMART LIGHTING PRODUCTS**

Open the Dals Connect app. To add a product, click on "Add Device" or the icon at the top right corner.

Choose the product you want to add among the proposed choices.

In the "Search for Device" tab, make sure to "EnableWi-Fi" if it is not already enabled. If you purchased a Bluetooth device, "Enable Bluetooth". If you are unsure of the device type, please enable all these permissions

To add your product, follow the 3 steps: 1- Power on 2- Turn On-off-on-off-on (Subject to User Manually) 3- Ensure the light is fast blinking Click on "Confirm indicator rapidly blink".

Connect your device to your Wi-Fi network. Enter your Wi-Fi and password in the space provided. Only 2.4 GHz Wi-Fi networks are supported.

CONNECT AND ADD SMART LIGHTING PRODUCTS

Your device is now connecting to your Wi-Fi network. Place your router, mobile phone, and device as close as possible. If the connection failed, please ensure the last steps were done correctly. Repeat if needed.

Your device has been added successfully. Click on "Done"

You can name your devices here. It will help you to organize your devices tree in the menu.

Your device will appear on your home screen. You can directly manage all of your lighting products here.

LIGHT UP YOUR WORLD WITH DALS

You can directly manage all of your lighting products on the menu by toggling On/Off or by clicking on a device for full customization.

#### ACTIONS

"Scenario" let you control multiple devices with one tap or by using an AI speaker through voice commands. "Automation" executes automatically according to conditions such as the weather, device status, and time.

#### AUTOMATION

Once you click on "Add Automation Scenario", select a condition by clicking on the icon. Same thing for the action. Then enter the period in which the automation will occur. Edit the name, the picture and click on "Save".

**ACCOUNT** Set your profile, secure your account, connect to AI speakers such as Google Assistant or Amazon Alexa, and much more. Need help? Click on the "Help Center" button

#### LIGHT UP YOUR WORLD WITH DALIS

You can directly manage all of your lighting products on the menu by toggling On/Off or by clicking on a device for full customization.

Once you click on a device, you can set its colors, create multiple scenes and configure schedules.

## COLORS

In the "Presets" section, you can edit a preselected color, enter a new color and then save it.

## SCENES

In the "Presets" section, you can select or create your own home atmosphere. To personalize your scene, click on "Edit".

## SCENES

Once you click on "Edit", you can change the scene name, create your own color composition, select your conversion mode (Static/Flash/Breath) and adjust the conversion speed.

## SCHEDULES

You can configure time actions by clicking on "Add timing" which let the app toggle lights On/Off at a specific time.

## SCHEDULES

Once you click on "Add timing", you can set the time and then select how often you want the device to switch On/Off.

## GOOGLE ASSISTANT

Open the Google Home app and click on “Add”, then click on “Set up device”.

Click on “Have something already set up?” in “Works with Google”.

In the search box, enter Magic Home WiFi” then select it.

Log in with your current account, the same account used during the “A4” step.

Your Dals smart devices will be listed in the “Home” section. Adding devices to a room enables commands like “turn on the living room lights”.

Try saying, “Ok Google” then...

- “ Turn on the light name/ room name”
- “ ...Dim light name ”
- “ Brighten light name ”
- “ Set the light name to 20% ”
- “ Dim/Brighten light name to 50% ”
