Danfoss ESMD Temperature Sensor
Installation Guide

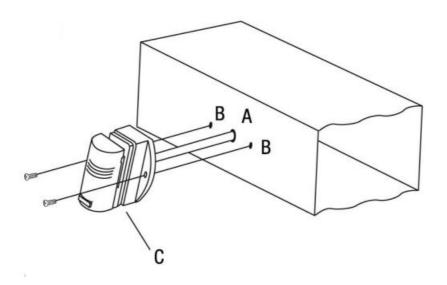

**Installation Guide** 

## **ESMD**

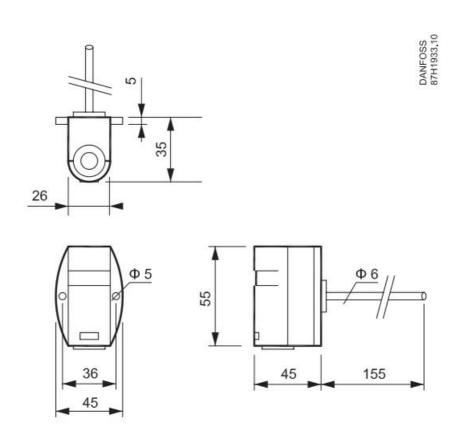

**ESMD** 

- 1. Drill a 6.5 mm hole in the middle of the air duct at a place where the temperature sensor is not influenced by stratified air, heat or humidifiers. Place the temperature sensor in the air duct (A).
- 2. Drill two 4 mm holes though the flange holes (B) of the ESMD. It is recommended to mount the ESMD with the cable inlet facing down. Use two 5 mm self-cutting screws (not delivered) for mounting the ESMD.
- 3. Make a small hole in the black rubber cable inlet and put the cable through the inlet (C). Press the orange tabs to connect wires. Polarity not important.
- 4. Mount white front cover onto the ESMD.
