Delta Keymap Program (only Remap Keyboard Keys]

Download the keymap program on **www.darkwalkerpro.com/download**

XBOX ONE

Installation:

1. Power off your Xbox One official controller and connect it to the Keyboard's USB port with a charge&sync cable;
2. Plugin the mouse to the Keyboard's USB port;
3. Plugin the Keyboard to your Xbox One console. Wait for a few seconds, you will be able to use the keyboard&mouse instead of game controller.

Note:
Only Microsoft Xbox One controller works with the Keyboard. If the keyboard&mouse do not work after you plug in everything. Please re-plug in everything to the console. Voice chat only works when you plug in the headset to the keyboard.
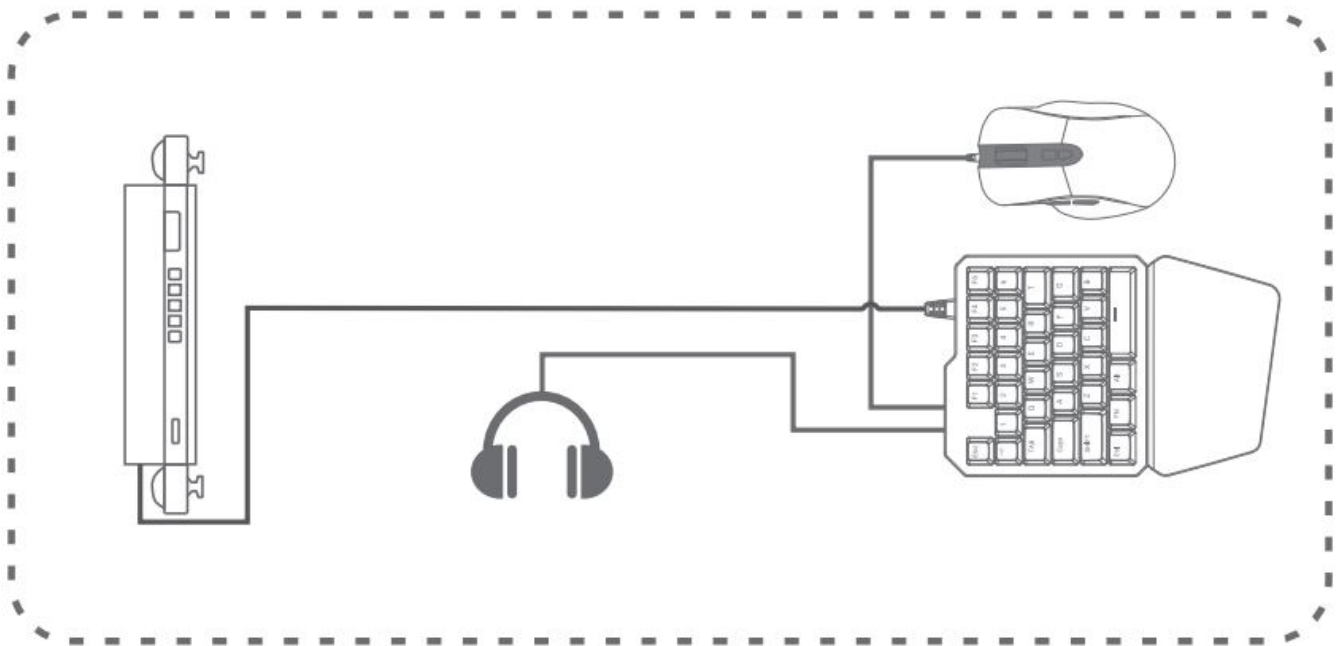

PLAYSTATION 4

Installation:

1. Power off your official DualShock 4 controller and connect it to the Keyboard's USB port with a charge&sync cable.
2. Plugin the mouse to the Keyboard's USB port.
3. Plugin the Keyboard to your PS4 console. Wait for a few seconds, you will be able to use the keyboard&mouse instead of game controller.

Note:
Only Sony DualShock 4 controller works with the Keyboard. If the keyboard&mouse do not work after you plug in everything. Please re-plug in everything to the console. Voice chat only works when you plug in the headset to the keyboard.

NINTENDO SWITCH

Installation:

1. Use controller to turn on your Switch and go to "Settings" — "Controllers and Sensors" –" PRO Controller Wired Communication" — click ON. Back to Home menu.
2. Plugin the mouse to the Keyboard's USB port.
3. Plugin the Keyboard to your Nintendo Switch console.

Note:
Do not control the menu with Pro or Joycon controller in-game, or the keyboard will be disconnected. You must turn on the "PRO Controller Wired Communication" or you will get an error message. If the keyboard&mouse do not work after you plug in everything. Please re-plug in everything.
