Introduction

Datacolor ColorReader EZ Model DC10-3 is an accurate color reader designed to measure an inspiration color and report the nearest reference color from a proprietary color system.

You can use Datacolor ColorReader EZ to quickly and accurately measure samples, and find the closest color match in a fan deck collection stored on the mobile application. Bluetooth connectivity works with the Datacolor ColorReader mobile application when installed on portable devices including cell phones and tablets. Using this mobile

application, you can easily store, recall, and examine project color information in real time.

Requirements

The requirements to run the Datacolor ColorReader mobile application include:

Mobile Device

iPhone®

iPad® iPod Touch®

Android® Bluetooth®

Operating System

iOS® v. 9.3 or higher

iOS® v. 9.3 or higher

iOS® v. 9.3 or higher

v. 6.0 or higher

v. 4.0 or higher

Included

The packaging includes:

- Datacolor ColorReader EZ measuring device
- Two installed CR2032 lithium batteries
- Welcome card with product information and link to goto.datacolor.com/getcrez

Getting Started

Install the Mobile Application

1. Go to your mobile device's settings menu and turn on Bluetooth.
2. Ensure your Datacolor ColorReader EZ contains two working CR2032 lithium batteries.
3. Install and open the Datacolor ColorReader mobile application from the Apple App Store or Google Play Store.

Datacolor ColorReader

4. Follow the on-screen instructions to turn on and connect your ColorReader EZ unit, select your region, then complete the registration screen.

This is a screenshot of the 'Setup your device' screen in the Datacolor ColorReader app. At the top, there is a 'Back' button and a 'Region' header. The main heading is 'Setup your device'. Below it, a note states: 'This is used to match colors that are available in your region. If you have an OEM branded device, click [HERE](#).' Underneath, there is a section titled 'Select your region' with three options: 'North America' (checked), 'Europe' (checked), and 'Asia' (checked). At the bottom, there is a red 'Next' button.This is a screenshot of the 'Register your new ColorReader' screen in the Datacolor ColorReader app. At the top, there is a 'Back' button and a 'Register' header. The main heading is 'Register your new ColorReader'. Below it, the serial number 'Serial: YDC_BIC_810070829' is displayed. The screen is divided into three sections: 'About you' with fields for 'First Name', 'Last Name', and 'Email Address'; 'User Type' with a dropdown menu set to 'Select one'; and 'Stay Connected' with a 'Subscribe' button (checked). At the bottom, there is a section titled 'Tell Us What You Want' with a 'Share' button (checked).

Calibration

Calibrate the unit every 8 hours to account for any changes over time. This ensures that the readings remain consistent. The Datacolor ColorReader mobile application will remind you when calibration is required.

1. Tap the yellow notification, or tap 'Device' and navigate to the 'Calibration' tab.

2. Follow the on-screen instructions to position the calibration tile.

3. Tap 'Calibrate' on the screen. The application will confirm calibration success.

Take Readings

When you find a color you want to capture, use the ColorReader EZ to take a reading and find the color data or closest matches from popular color collections on the mobile

application.

1. Ensure the calibration tile is flipped back to expose the aperture.
2. Place the aperture over the area you want to read. The area should be flat and the solid color completely fills the aperture area.
3. Tap 'Read' on the screen or press the ColorReader EZ button. The mobile application will show the results.

On the left you will see the reading color.

On the right you will see the closest matches to the reading within the color collections available on your mobile application.

Mobile Application

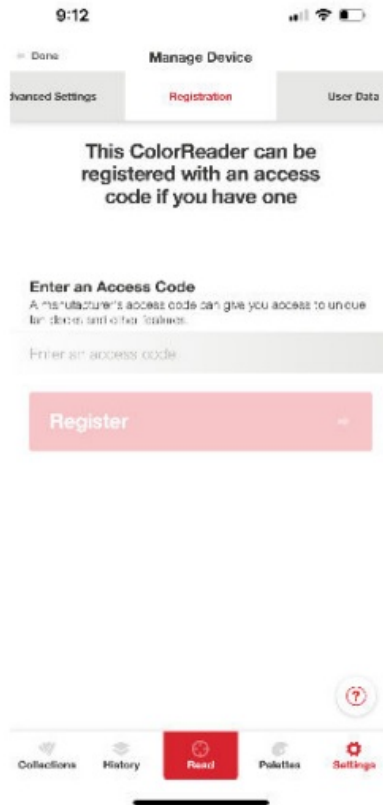

From any menu, tap 'Done' to return to the main screen.

Device Menu

This menu allows you to manage your device.

Registration

Use this tab if you are given an exclusive access code to change your available color collections to find matches for your readings

1. Enter the access code you were provided.
2. Tap 'Register'. The mobile application will ask you to confirm then automatically update your color collection list.

If you already entered an access code, this tab will have your access code information.

Device Info

Use this tab to disconnect your ColorReader EZ and confirm technical information about your unit.

Calibration

Use this tab to see the current calibration status or run a new calibration.

Calibrate the unit every 8 hours to account for any changes over time. This ensures that the readings remain consistent. The Datacolor ColorReader mobile application will remind you when calibration is required.

1. Follow the on-screen instructions to position the calibration tile.
2. Tap 'Calibrate' on the screen. The application will confirm calibration success.

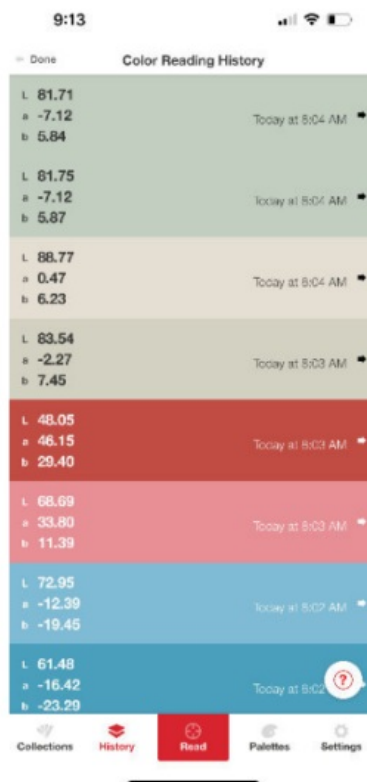

Support

Use this tab to be sent directly to the online support site where you can submit a ticket or call our representatives for any issues you may be experiencing.

History Menu

All your measured readings are saved to be viewed at any time.

Reading Info

Tap one of your previous readings in 'History' to see the color data in CIE L*a*b, RGB, and HEX values.

(Note: The L*a*b* values are valid for D65/10* Illuminant/Observer)

Get Match

After selecting a previous reading from 'History', tap 'Get Match' to find the closest matches within your color collections.

Save Reading

After selecting a previous reading from 'History', tap 'Save Reading' to save to a palette.

Read Menu

When you find a color you want to capture, use the ColorReader EZ to take a reading and find the color data or closest matches from popular color collections on the mobile application.

1. Ensure the calibration tile is flipped back to expose the aperture.
2. Place the aperture over the area you want to read. The area should be flat and the solid color completely fills the aperture area.
3. Tap 'Read' on the screen or press the ColorReader EZ button. The mobile application will show the results.

Reading Info

After taking a new reading, tap 'Info' to see the color data in CIE L*a*b*, RGB, and HEX values. (Note: The L*a*b* values are valid for D65/10° Illuminant/Observer)

Save Reading

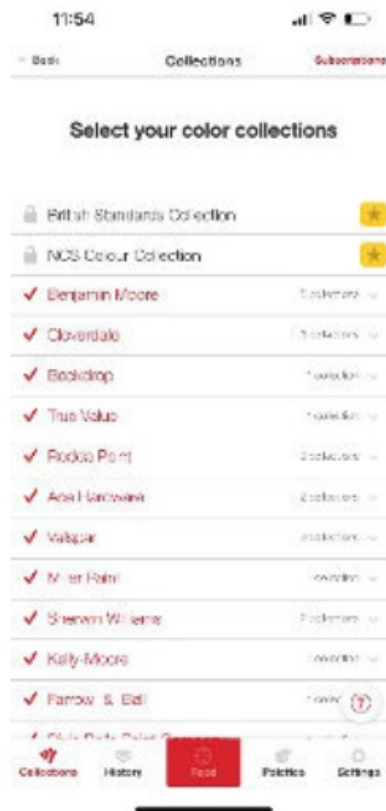

After taking a new reading, tap 'Save Reading' to save to a palette.

Change Match From

After taking a new reading or tapping 'Get Match' on a previous reading, you can change the color collections used to find the closest matches.

1. Tap 'Collections' to view the full list of color collections available on your mobile application.

2. Tap on each color collection to activate or deactivate from the search. The color collection name will be red if it is activated or gray if deactivated.
3. Tap 'Re-match' and the closest matches will change to options from your activated color collections.

Closest Matches

After taking a new reading or tapping 'Get Match', you will see the closest matches to the reading within the color collections available on your mobile application. Tap on a swatch to see more information.

View Fan Deck

After selecting a swatch, tap 'View Fan Deck' and the selected swatch will be highlighted in a visual atlas of the colors in the full collection.

Coordinate Colors

After selecting a swatch, tap 'Coordinate Colors' to view four colors that combined with your selected swatch create Complimentary, Triad, Analogous, and Monochromatic color schemes.

For more information on color schemes, tap 'About Color Schemes'.

You can tap any of the recommended colors to find their closest color matches or reading info.

You also have the option to tap 'Save as Palette' to automatically create a new palette. The original swatch will be saved in the 'Swatches' tab, and the four additional recommended colors will be saved in the 'Readings' tab.

Save Swatch

After selecting a swatch, tap 'Save Swatch' to save to a new or existing palette.

Color Data

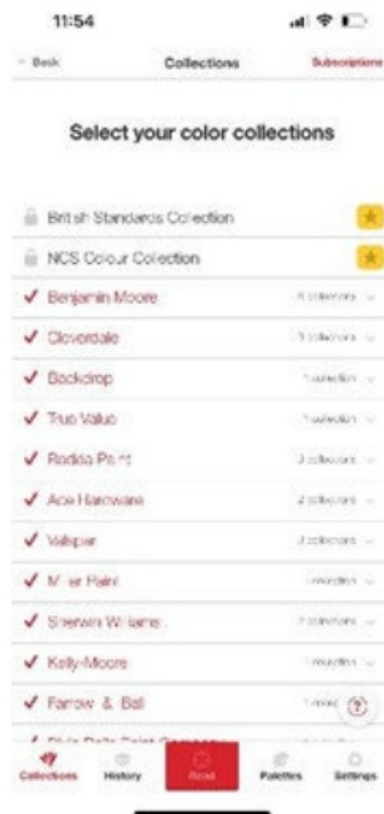

After selecting a swatch, tap 'Color Data' to see the color data in CIE L*a*b, RGB, and HEX values. You may also see notes the manufactures has added. (Note: The L*a*b* values are valid for D65/10° Illuminant/Observer)

Colors Menu

Color Collections

All your color collections available on your mobile application are listed here.

View Fan Deck

After selecting a color collection, you will see a visual atlas of the colors in the full collection. You can then tap any color to view the swatch.

Search

After selecting a color collection, you can type in a specific color name or color number in the search bar to quickly find a specific color. You can then tap any color to view the swatch.

Palettes Menu

When you save a reading or swatch they are stored in a palette. (Note: You can only create a new palette when saving a reading or swatch)

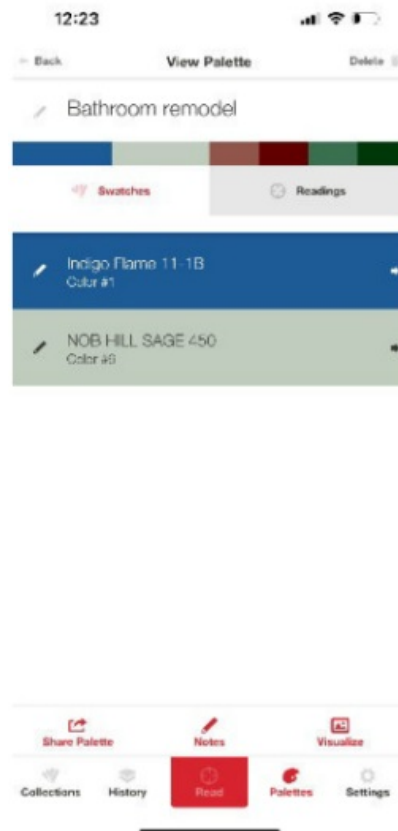

To view the colors saved in a palette, tap the palette you want to review.

You can label a palette by tapping the palette label and typing a new label.

To delete a palette and the colors saved within, tap 'Delete' and confirm.

Swatches

This tab shows your saved swatches in the selected palette. Tap the color to view the swatch.

You can tap the pencil icon next to the color to assign a label.

To delete a color, tap the pencil icon next to the color you want to delete a tap 'Delete' and confirm.

Readings

This tab shows your saved readings in the selected palette. Tap the color to view the reading info.

You can tap the pencil icon next to the color to assign a label.

To delete a color, tap the pencil icon next to the color you want to delete a tap 'Delete' and confirm.

Notes

You can add additional notes to your palette by tapping 'Notes'.

Share Palette

After you have completed creating a palette, tap 'Share Palette' to create a unique link that will display the selected palette's swatches and readings with your labels and notes. Then choose the application that you want to share/send the link with.

Battery Information

Datacolor ColorReader EZ is equipped with two replaceable CR2032 lithium batteries. With fresh batteries, the device is good for 300 measurements.

To replace:

- Pull out the battery tray inserted in the back end of the device.
 - Model DC10-3 (SKU: CRM110) – Insert tool (such as a screwdriver) to release battery tray and pull out tray

- Model DC10-3 (SKU: CRM100) – Pull out battery tray
- Remove the old batteries and replace with two new CR2032 lithium batteries.

- Push the battery tray back into the device until it is locked in place.

Please note:

- Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate.
- Even used batteries may cause severe injury or death.
- Call a local poison control center for treatment information.
- Non-rechargeable batteries are not to be recharged.
- Do not force discharge, recharge, disassemble, heat above (manufacturer's specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
- Ensure the batteries are installed correctly according to polarity (+ and -).
- Do not mix old and new batteries, different brands or types of batteries, such as alkaline, carbon-zinc, or rechargeable batteries.
- Remove and immediately recycle or dispose of batteries from equipment not used for an extended period of time according to local regulations.
- Always completely secure the battery compartment. If the battery compartment does not close securely, stop using the product, remove the batteries, and keep them away from children.
- See Lithium Battery Statements in Safety Warning Section on page 24.

LED Indicator

An LED indicator identifies the current state of the unit:

| LED Color | Instrument State |
|-----------|-----------------------|
| Off | Device is not powered |
| Green | Device is on |

Sleep Mode

Datascor ColorReader EZ will power off to sleep mode when it is inactive for more than 5 minutes.

When the device is in sleep mode and you try to access to it through the mobile application, it will ask you to wake the unit. Press the button on the unit.

General Information

Power Source

Datacolor ColorReader EZ Model DC10-3 has two replaceable CR2032 lithium batteries. The batteries are inserted in the back end of the device.

Operation

This product is to be used only as specified by the manufacturer, and according to the instructions for operation and maintenance provided herein.

Wireless Communication Capability

Datacolor ColorReader EZ is Bluetooth®-capable (4.0 or higher)

Optical Configuration

45°/0° type

Colorimetric Data

1976 CIE L*a*b* coordinates; Illuminant D65; 10° Standard Observer

Device Markings

Several markings on the bottom of the unit include the following information:

- Instrument Model
- Ratings
- Compliance and certification information

Serial Number

The serial number is programmed into the Datacolor ColorReader EZ and is displayed on the back of the packaging and in the mobile application under the device tab.

Instrument Maintenance

There are no user-serviceable parts for this equipment.

Safety Warnings

Caution

If any of the following conditions exist, turn off the device:

- The device is exposed to water or other excess moisture.
- The device is dropped or damaged.
- The device needs service.

The protection of the device may be impaired if used in a manner not specified by the manufacturer.

To ensure operational safety:

- Keep the device away from sources of liquids such as sinks, tubs, showers, etc.
- Protect the device from excess moisture.
- Follow all instructions and warnings provided with the unit.
- Read all instructions carefully before turning on the device.

Lithium Batteries:

- Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate.”
- Even used batteries may cause severe injury or death.
- Call a local poison control center for treatment information.
- Non-rechargeable batteries are not to be recharged.
- Do not force discharge, recharge, disassemble, heat above (manufacturer’s specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
- The nominal battery voltage is 6V DC
- Ensure the batteries are installed correctly according to polarity (+ and -).
- Do not mix old and new batteries, different brands or types of batteries, such as alkaline, carbon-zinc, or rechargeable batteries.
- Remove and immediately recycle or dispose of batteries from equipment not used for an extended period of time according to local regulations.
- Always completely secure the battery compartment. If the battery compartment does not close securely, stop using the product, remove the batteries, and keep them away from children.

Compliance Statements

FCC Compliance Statement

WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide

reasonable protection against harmful interference when the equipment is operated in a residential environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with these instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning equipment off and on, the user is encouraged to try and correct the interferences by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Pursuant to Part 15.21 of the FCC rules, any changes or modifications to this equipment not expressly approved by Datacolor may cause harmful interference and void the FCC authorization to operate this equipment.
