DATEQ

DATEQ MDM-44DT Network Audio Converter

Specification

- Input channels: 4x balanced input, Mic/Line level
- Input interface: 3.81mm Phoenix, 12-pin
- Input impedance: 11.5k ohm
- Max input level: 12dBu/Line; 12dBu/Mic
- Phantom: DC +48V 4.5mA/ch
- Output channels: 4x balanced output, Line level
- Frequency response: 20Hz to 20kHz(+/-0.1)/Line; 20Hz to 20kHz(+/-0.1)/Mic

- THD+N: -90dB(0dBu, 1kHz, A-wt)/Line; 90dB(0dBu, 1kHz, A-wt)/Mic
- SNR: 93dB(0dBu, 1kHz, A-wt)/Line; 93dB(0dBu, 1kHz, A-wt)/Line
- Power supply: DC +12V
- Dimension: 215mm*145mm*45mm
- Net weight: 1.2kg
- Gross weight: 1.4kg

Product Usage Instructions

Panel Operating

1. Power on/off
2. Menu select and enter
3. ESC
4. LCD display
5. Power on indicator
6. Network indicator
7. Control indicator
8. Input signal indicator
9. 48V indicator
10. Output signal indicator

Connections

When connecting inputs and outputs

- If connecting to a balanced source, wire signal hot+ to hot+, cold- to cold-, and earth G as normal.
- If connecting to an unbalanced source, wire signal hot+ to hot+ and cold-.

Dante Network Audio Routing

1. Download and install Dante Controller from www.audinate.com .
2. Connect audio devices to the converter and then to a LAN switch.
3. Open Dante Controller to route the audio signals.

PC Control Software Setup

1. Use PC control software MusicAIDSP to configure the converter.
2. Adjust parameters like Line/Mic, gain, and 48V on/off.

Software Support for LAN (UDP) and Serial RS232 Connections

To set up connections

1. Select Device List – Settings – UDP(LAN) or COM(RS232) OK in the software.
2. For UDP(LAN) connection, use the RJ45 dual-network port on the rear panel for control.
3. For COM(RS232) connection, choose the port and baud rate for communication.

Frequently Asked Questions (FAQ)

- **Q: What type of microphones are supported by the converter?**
 - A: Only balanced condenser microphones are supported.
- **Q: How do I ensure proper connection when using balanced devices?**
 - A: Wire signal hot+ to hot+, cold- to cold-, and earth G as normal when connecting to balanced devices.

MDM-44DT

Network audio convertor 4x4

4x4 Dante channels

Technical Parameters

- **Input channels:** 4x balanced input, Mic/Line level
- **Input interface:** 3.81mm Phoenix, 12-pin
- **Input impedance:** 11.5k ohm
- **Max input level:** 12dBu/Line; 12dBu/Mic
- **Phantom:** DC +48V 4.5mA/ch
- **Output channels:** 4x balanced output, Line level
- **Frequency response:** 20Hz to 20kHz(+/- 0.1)/Line; 20Hz to 20kHz(+/-0.1)/Mic
- **THD+N:** -90dB(0dBu, 1kHz, A-wt)/Line; -90dB(0dBu, 1kHz, A-wt)/Mic
- **SNR:** 93dB(0dBu, 1kHz, A-wt)/Line; 93dB(0dBu, 1kHz, A-wt)/Line
- **Power supply:** DC +12V
- **Dimension:** 215mm*145mm*45mm
- **Net weight:** 1.2kg
- **Gross weight:** 1.4kg

Panel operating

1. Power on/off
2. Menu select and enter

3. ESC
4. LCD display
5. Power on indicator
6. Network indicator
7. Control indicator
8. Input signal indicator
9. 48V indicator
10. Output signal indicator

- **A.** Power plug
- **B.** RJ45 dual port for Dante network
- **C.** RS232 interface (RX TX G)
- **D.** Balanced analog output
- **E.** Balanced analog input (Line/Mic level)

Connections

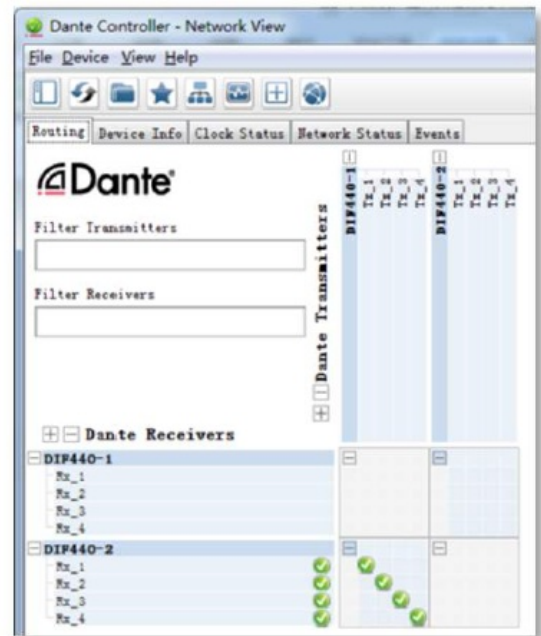

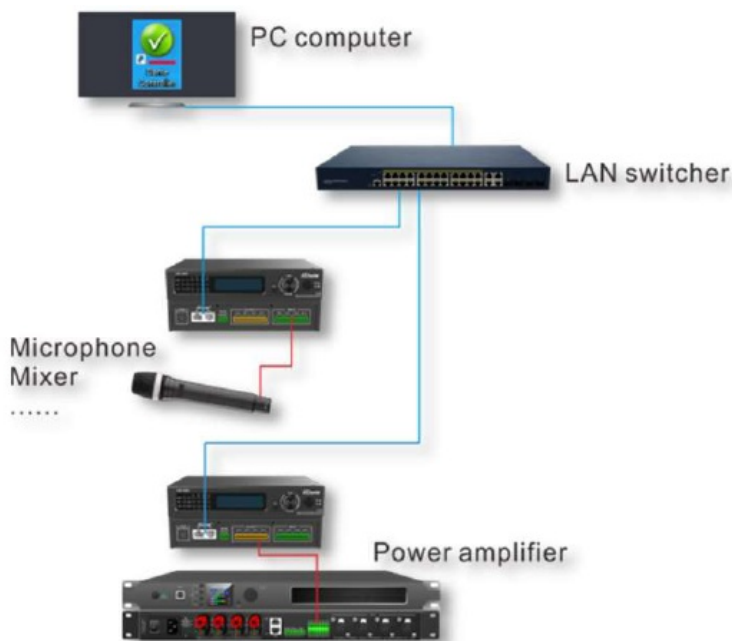

1. When input is connected to a balanced source , wiring signal hot+, cold- and earth G in normal.
2. When input is connected to a unbalanced source , wiring signal hot+, cold-.
3. When output is connected to a balanced device, wiring signal hot+, cold- and earth G in normal.
4. When output is connected to a unbalanced device, wiring signal hot+, earth G.

Notice: only balanced condenser microphones are supported.

Dante network audio routing

1. Setup software Dante Controller which can be downloaded from www.audinate.com.
2. Connect audio devices to this converter, and then connect it to a LAN switch.
3. Open Dante Controller and route the audio signals.

PC control software

Setup this Dante converter by using PC control software MusicAIDSP, and set parameters like Line/Mic, gain, 48V on/off.

Software support LAN (UDP) and serial RS232 connections

“Device List” – “Settings” – “UDP”(LAN) or “COM”(RS232) – “OK”

1. UDP(LAN) connection: there is RJ45 dual-network port on rear panel. Except for Dante network audio, it can be used for UDP control. After selecting it and clicking OK, the software will scan and find the Dante network audio convertor.

Remark: The Dante network audio convertor and PC should be in same IP range, like 168.254.xxx.xxx. If not the same, please set it by right clicking as per below picture, which will show Net settings window.

2. COM(RS232) connection: please select corresponding port and baud rate of COM connection, then the software will scan and find the Dante network audio convertor.
