DaToo DT-25A Mini Aquarium Heater

Launch Date: July 17, 2020

Price: \$15.75

Introduction

The DaToo DT-25A Mini Aquarium Heater is a small and effective way to keep the water in small tanks and fish bowls at the right temperature. It works best with tanks that are between 1 and 5 gallons because it has 25 watts of power. The warmer lets you precisely control the temperature, keeping it at 78°F (25.5°C) for betta fish and other tropical fish. Its fully underwater design makes sure that the heat is spread evenly, and the safety features, like turning off automatically when the temperature is reached, give you peace of mind. Made from good materials, this small heater lasts a long time, is simple to set up with suction cups, and runs quietly to keep your fish calm.

Specifications

- **Model:** DT-25A
- **UPC:** 745408757995
- **Brand Name:** DaToo
- **Power:** 25 Watts
- **Voltage:** 110V~120V, 50-60Hz
- **Heater Size:** 4.9" x 0.9" x 0.9"
- **Power Cord Length:** 3.9 feet
- **Reusability:** Reusable
- **Immersion Depth:** Fully submersible
- **Lower Temperature Rating:** 78°F (25.5°C)
- **Upper Temperature Rating:** 78°F (25.5°C)
- **Display:** Digital
- **Application:** Suitable for 1 to 5-gallon aquariums
- **Indoor/Outdoor Usage:** Indoor use only

- **Outer Material:** Durable Plastic
- **Product Care Instructions:** Wipe clean
- **Unit Count:** 1 unit

Package Includes

- 1 x **DaToo DT-25A Mini Aquarium Heater**
- 2 x **Suction Cups** for mounting the heater inside the tank
- 1 x User Manual

Features

1. **Compact and Efficient Design:** The DaToo DT-25A Mini Aquarium Heater is made to fit smaller tanks, with a maximum volume of 25 liters (6.5 gallons). Its design is small and efficient. Its small size and sleek design make it great for nano aquariums, betta fish bowls, and other small spaces, providing a discreet yet effective way to heat things up.
2. **Temperature Control:** The DaToo DT-25A has an easy-to-use temperature switch that lets you change the water temperature from 20°C (68°F) to 34°C (93°F). Because of this, it's easy to keep your exotic fish, aquatic plants, or reptiles at the right temperature.
3. **Submersible:** The DaToo DT-25A is made to be submersible in water. This feature makes sure that the heater works well because it can be submerged fully underwater without breaking. It helps keep the water temperature even throughout the tank, which makes your marine pets more comfortable.
4. **Reliable and safe operation:** The DaToo DT-25A will turn off by itself when the water hits the set temperature because it has overheating protection. This built-in safety feature keeps the tank from getting too hot, so your fish or plants will never be exposed to dangerously high or low temperatures.

5. **Built to Last:** This heater is made of high-quality ABS plastic, so it will last to use. The material won't rust or

corrode, so the DaToo DT-25A will keep working well even in a tank, which is a damp and humid place.

6. **Quiet Operation:** The DaToo DT-25A aquarium heater is quieter than bigger, more powerful aquarium heaters. This makes it perfect for use in home aquariums or tanks that are in quiet places, where it won't bother your pets or your peace of mind.
7. **Suction Cup Mounting:** The heater comes with suction cups that make it easy to put in your tank. Based on how the water flows best in your tank, the suction cups let you place the heater either vertically or horizontally. This makes sure that the heat is spread out evenly and keeps your tank from getting cold spots.
8. **Even Temperature of 78°F:** The DaToo DT-25A keeps the water at 78°F (25.5°C), which is perfect for betta fish and many other tropical species. If the water temperature drops below this level, the heater will turn on automatically. It will turn off when the water hits the ideal 78°F, making sure your pets stay comfortable.
9. Another small 25W heater is the DaToo DT-25A, which is one of the smallest 25W aquarium heaters on the market and was made to fit small tanks. Because it's so small, it works well with tanks that are 1 to 6 gallons. It's so small that you can easily hide it or put it somewhere in the tank that no one will notice, giving your fish more room.
10. **Rubber Sealing Layer:** The DaToo DT-25A has a rubber sealing layer that makes it safer and last longer. This layer makes a better seal than regular plastic locks. This feature keeps water from getting into the heater's internal parts, which makes it safe and waterproof and greatly lowers the chance of an electricity leak.
11. **Quartz Glass:** The DaToo DT-25A is made of high-quality quartz glass, which means it can't explode or break. This makes sure that the heater is strong and will last, even when it's under steady water pressure and heat. You can count on the heater to work safely and for a long time.
12. **Setup Doesn't Need Any Tools:** The DaToo DT-25A is very simple to set up and install. Just put the heater inside the tank and use the suction cups to hold it in place. There's no need for any extra tools or difficult steps. It is fully charged and ready to use as a stable heat source for your aquarium.
13. **The operation that uses little electricity:** The DaToo DT-25A heater uses only 25W of electricity, so it uses as little electricity as possible while still heating well. It's a great deal for smaller tanks because it keeps the water at the right temperature without making energy costs go up by a lot.
14. **Warranty of One Year:** The DaToo DT-25A has a warranty of one year, which gives customers peace of mind. If your heater breaks down, you can call the professional customer service line 24 hours a day, 7 days a week, and the guarantee will cover repairs or a new heater.
15. **Great for Small Tanks (1 to 6 Gallon):** The DaToo DT-25A works great in glass or acrylic tanks that are 1 to 6 gallon in size. Its small, compact size makes it great for desktops or tanks that don't have a lot of room.

Usage

- **Ideal for Betta Fish & Small Aquariums:** Best suited for aquariums or fish bowls between 1 to 5 gallons.
- **Maintains Constant Temperature:** Keeps the water at **78°F (25.5°C)**, which is ideal for most tropical fish species.
- **Installation:** Simply place the heater inside your aquarium and attach it with the included suction cups. No tools required.

Care and Maintenance

- **Cleaning:** Wipe clean the exterior of the heater with a damp cloth. For more thorough cleaning, remove the heater from the tank and clean it with a soft brush to remove any debris.
- **Regular Checks:** Periodically check that the heater is securely attached with suction cups and that the power cord is not damaged.
- **Storage:** When not in use, store the heater in a dry, cool place away from moisture and sunlight.

Troubleshooting

The heater is not heating the water:

- Ensure the heater is fully submerged.
- Check if the temperature setting is at **78°F (25.5°C)** and the water temperature is below this level.
- Inspect the power cord and plug to ensure they are securely connected.

The heater is heating but the water temperature seems too low:

- The heater will stop heating once the water reaches **78°F**. Use a thermometer to verify the temperature. If it's below 78°F, check that the heater is operating properly or consider using a more powerful unit for larger tanks.

Water appears too hot or too cold:

- The **DaToo DT-25A** maintains a constant temperature of **78°F (25.5°C)**. If you need a different temperature, consider adjusting the thermostat or choosing a different heater model suitable for your desired temperature range.

The heater is making unusual noise:

- This is unusual as the **DaToo DT-25A** operates quietly. Check for any debris or obstruction around the heater, as it could affect its operation.

Pros and Cons

Pros	Cons
Compact size fits small tanks	Limited power may not suit larger tanks
Automatic temperature control	May require additional monitoring
Easy installation	Not adjustable beyond preset temperature
Affordable price	Suction cups may lose grip over time

Warranty

The DaToo DT-25A Mini Aquarium Heater comes with a one-year warranty covering manufacturing defects. Ensure you keep your purchase receipt for warranty claims.

FAQs

What size aquarium is the DaToo DT-25A Mini Aquarium Heater suitable for?

The DaToo DT-25A Mini Aquarium Heater is designed for aquariums ranging from 1 to 5 gallons, making it ideal for small tanks or fish bowls.

What is the temperature range of the DaToo DT-25A Mini Aquarium Heater?

The DaToo DT-25A maintains a constant temperature of 78°F (25.5°C), which is perfect for betta fish and most tropical species.

How does the DaToo DT-25A Mini Aquarium Heater work?

The DaToo DT-25A heater works by automatically heating the water to 78°F (25.5°C), and it shuts off when the desired temperature is reached to prevent overheating.

What is the power consumption of the DaToo DT-25A Mini Aquarium Heater?

The DaToo DT-25A uses only 25 watts of power, making it energy-efficient and cost-effective for maintaining the right water temperature.

How do I install the DaToo DT-25A Mini Aquarium Heater?

The DaToo DT-25A comes with suction cups that allow easy installation inside the aquarium. Simply attach the heater vertically or horizontally based on your preference.

Can the DaToo DT-25A Mini Aquarium Heater be used for saltwater aquariums?

While the DaToo DT-25A is suitable for freshwater aquariums, it can also be used in small saltwater aquariums as long as it is submerged properly and maintained regularly.

What is the maximum depth that the DaToo DT-25A Mini Aquarium Heater can be submerged?

The DaToo DT-25A is fully submersible and can be used in water depths of up to 0.9 inches.

How long is the power cord of the DaToo DT-25A Mini Aquarium Heater?

The DaToo DT-25A comes with a 3.9-foot power cord, providing flexibility in where you place the heater within the aquarium.

Can I use the DaToo DT-25A Mini Aquarium Heater in a larger tank?

The DaToo DT-25A is best suited for small aquariums between 1 and 5 gallons. For larger tanks, a more

powerful heater would be required to maintain the desired temperature.

How does the DaToo DT-25A Mini Aquarium Heater ensure safety?

The DaToo DT-25A includes overheat protection that automatically shuts off the heater when the water temperature reaches 78°F (25.5°C) to prevent overheating and ensure the safety of your fish.

What materials are used in the DaToo DT-25A Mini Aquarium Heater?

The DaToo DT-25A is constructed from high-quality ABS plastic and features quartz glass for durability, making it both rust and corrosion-resistant in aquatic environments.

What is the ideal temperature for Betta fish with the DaToo DT-25A Mini Aquarium Heater?

The DaToo DT-25A maintains a consistent 78°F (25.5°C), which is perfect for Betta fish, as they thrive in stable warm water.

How long will the DaToo DT-25A Mini Aquarium Heater last?

With proper care, the DaToo DT-25A is built to last for several years. Its durable construction ensures it can withstand long-term use, making it a reliable heater for small aquariums.

How much does the DaToo DT-25A Mini Aquarium Heater weigh?

The DaToo DT-25A weighs only 0.3 pounds (140 grams), making it light and easy to handle while setting it up in your aquarium.
