DEEGO 983101BLK Fireproof Document Box with Lock

How to set a password?

This lock is a dual-control structure, Button1 controls Slot1, Button2 controls Slot2, and they are controlled by the same set of passwords. The initial combination is 0-0-0.

To set your personal combination, follow these steps:

1. Open the lock, pull down the reset button, and turn the dials to the desired combination.
2. Pull the Button1 or Button2 along the arrow, Please confirm the reset button has been reset!
3. Don't forget the new combination!

If you forget the password you set, the lock may no longer be opened and your important items will be locked inside.
