- When the appliance is not being used, always take out the batteries. A damaged appliance should never be used!

Device Features

- On/Off
- Tone
- Volume
- 2x AAA - 1.5 V

* ⏰ 30s.	◁ 120°	●—┤ 8 m	⟟ 3 m
*EN: Motion detector signals the movement once per 30 seconds.			

Motion Detector

- The motion detector signals the movement once per 30 seconds.

Operating Instructions

Turn ON/OFF
To turn on the device, keep the ON/OFF button pressed until the LED diode lights up and the detector emits two audio signals. To turn off the device, keep the ON/OFF button pressed until the detector emits one long audio signal.

Volume Settings
Set the desired volume by short-pressing the volume button. The motion detector has 5 different volume settings, including a silent mode.

Tone Settings
Set the desired tone by short presses of the tone button. The motion detector has 8 different tone settings.

Pairing the Motion Detector with the Receiver
Keep the "M" button on the receiver pressed for 3 seconds until the pairing mode is activated. Then, by short pressing of the "M" button, choose the desired diode colour. Press the volume button on the motion detector to transfer the signal for pairing.

Specifications

Power Supply	2x AAA – 1.5V
Detection Range	8m
Detection Angle	120°
Signal Interval	30 seconds

Compliance
 The company MOSS.SK, s.r.o. declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. The full text of the EU Declaration of Conformity is available at **www.delphin.sk**.
