3. Right click
4. DPI cycle
5. Forward
6. Backward
7. Indicator light
8. Mode switch
9. ON/OFF switch

- 10. AA battery
- 11. USB nano receiver

Features

- Multi-mode connection: 2.4G+BT3.0+BT5.0
- Multiple colors available
- Removable textile cover

Installation

2.4G:

Equip the mouse with battery, switching to the 2.4G mode, and press the left button, middle button and the right button at the same time for 3 seconds. The blue indicator light will flash rapidly. Then insert the USB nano receiver into the USB port and keep the mouse and nano receiver within 10cm. Then the connection will be built automatically.

BT3.0/BT5.0 mode:

The indicator light flashes continuously with green color and enters into Bluetooth coding mode when pressing the mode switch for more than 3 seconds in BT mode. Then build up the connection and choose BT3.0 mode or BT5.0 mode according to the bluetooth device interface.

If you want to switch device, you can press mode switch again and repeat above actions, the current device will be disconnected automatically. The indicator light will flash once, twice and three times respectively when shifting the DPI.

Specification

DPI	1000/1600(default)/2400
Polling rate	250Hz
Working voltage	1.5V
Working current	515mA
Compatible system	Windows 8/10/mac OS

Receiver Connection

Equipping the mouse with battery, insert the nano receiver to the USB port of your computer, pushing the ON button on the bottom of the mouse, and the receiver will detect the device automatically, plug and play.

Rebuilding up the Connection between Mouse and Receiver

If your mouse cannot work normally, you can try to build up the connection again between mouse and receiver, as following steps:

1. Take out the nano receiver from computer and insert again, it will detect automatically for about 15 seconds.
2. Keep the mouse in ON mode and with battery in correct direction
3. Keep the effective distance within 10CM between the mouse and receiver.
4. Press the left button, middle button (scroll wheel) and right button at the same time for about 1-3 seconds, then release it. The connection is being built for about 10 seconds.
5. If you cannot build up the connection in 10 seconds, please repeat the above steps.

Debugging Tips

- Check the receiver it is connected to the USB port.
- Check the ON/OFF button if in ON mode.
- Check the effective distance between mouse and the receiver, and shorten it.
- Rebuild up the connection between the mouse and receiver.
