Assembling Diagram

The diagram below is the overall See assembling diagram. the text below for detailed steps.

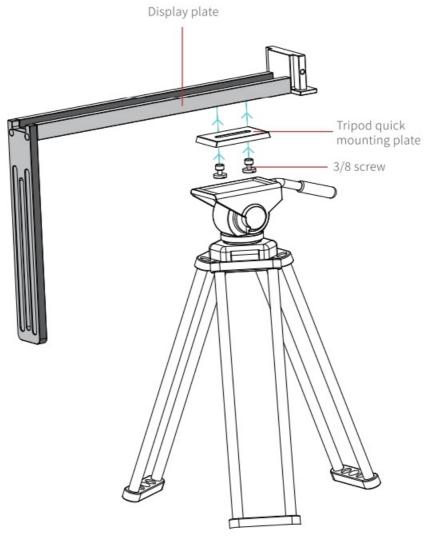

1. Installing tripod/castors

• Take out and unfold the tripod and castors; install the tripod to the castors and tighten it with screws. If the castors are not purchased, you can directly unfold and install the tripod, place it on smooth ground, and tighten it with screws.

2. Installing display plate

• Use the screws on the tripod quick mounting plate to fix the tripod and the teleprompting display plate.

3. Installing teleprompter

• Insert the slide block plate into the slot and fix it with thumb screws.

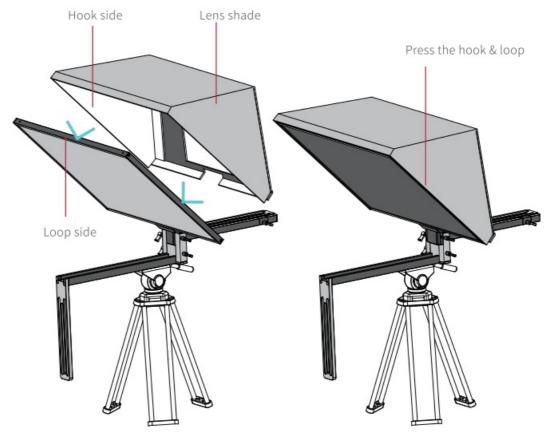

4. Installing spectroscope combo box

• Insert the spectroscope combobox into the plate slot and fix it with thumb screws.

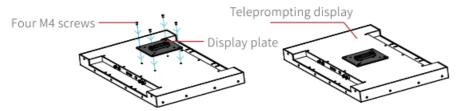

5. Installing lens shade

- Open the lens shade and zip it up; install the lens shade to the spectroscope combobox.
- **Note:** Both the combobox and the lens shade are equipped with hook & loop fasteners. When installing the lens shade, press the hook & loop fasteners to make them fully secure.

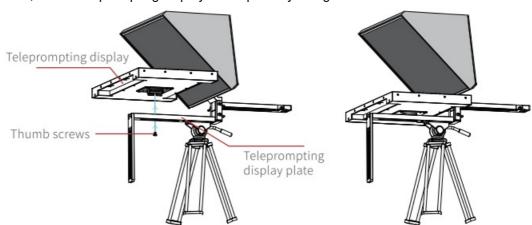

6. Installing teleprompting/self-inspection display

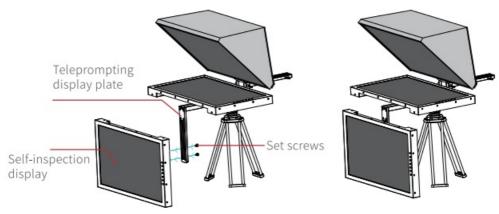

• First of all, fix the display plate to the display by using four M4 screws; do the same for any display with two screens.

• At the bottom, fix the teleprompting display to the plate by using thumb screws.

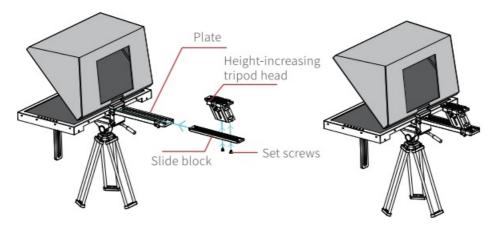

• Likewise, fix the self-inspection display to the plate by using thumb screws.

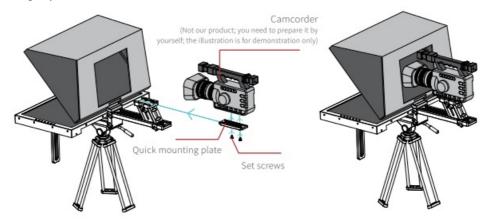

7. Installing tripod head & camcorder

• Take out the slide block in the tripod head; install the height-increasing tripod head; reinstall the tripod head to the plate after the tripod head height is adjusted by tightening the screws.

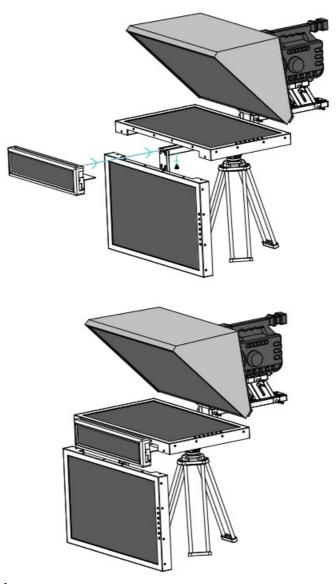

• Fix the quick mounting plate at the bottom of the camcorder, and install the camcorder to the top of the height-increasing tripod head.

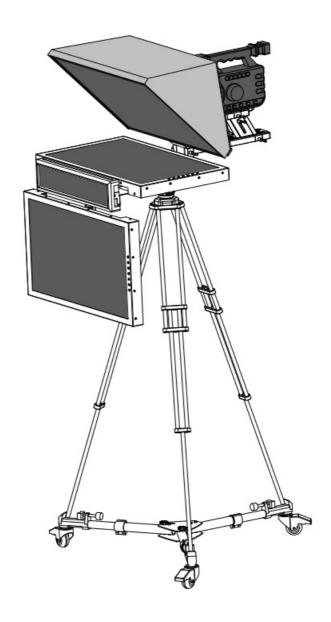

8. Installing timer

• Insert the timer into the plate slot and fix it by using thumb screws.

9. Teleprompter installation is done

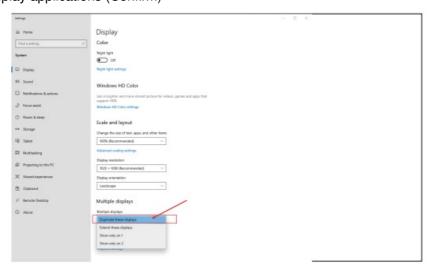

• Adjust the camcorder's focal length and the height-increasing tripod head to make the camcorder a suitable location for filming.

Computer Display Settings

Before using the teleprompter software, make sure your computer is connected to the teleprompter and has a normal display. Besides, choose the mode "duplicate these displays" for the multi-display settings.

- Windows10 settings: Make a right click on your computer desktop
- Display settings → Multi-display settings
- Duplicate these display applications (Confirm)

USB Drive and Dongle

• Note: The software must be used with a dongle and USB drive.

USB drive

Installing Software

• Find the installation package "Desview.exe" in the USB drive.

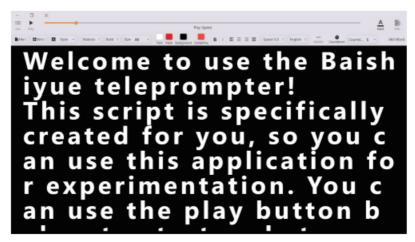

- 1. Double click Desview.exe
- 2. Click "Next
- 3. Click "Next

- 4. Click "Install"
- 5. Setup is finished
- 6. Insert the dongle for inspection

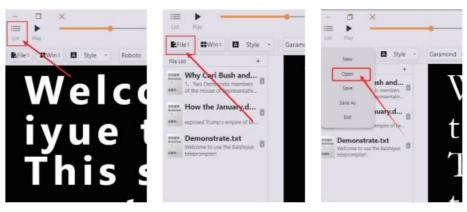

Teleprompter software interface the shortcut key "Space bar" is used to start/stop the manuscript.

- The format of the manuscript can be Word or TXT.
- · Manuscript amendment and saving are supported.

- 1. Open the "List" in the upper left
- 2. Choose "File
- 3. Open a manuscript of Word or TXT

• Interface of a successful manuscript operation

Commonly used options for text adjustment

For diverse scenarios, you may adjust the display options for the most appropriate reading experience.

- Center
- · Row height settings
- Font size

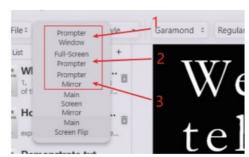

- · Font selection
- · Font color settings
- · Manuscript countdown setting

Display mirror image settings

• **Note:** Depending on the modes "Duplicate these displays" and "Expand these displays", the mirror flipping is different. The mode "Duplicate these displays" is recommended.

1. Duplicate these displays:

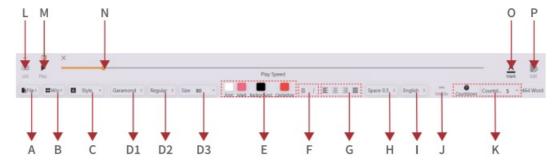

• After opening the software, the teleprompter makes a one-touch mirror image flip.

2. Expand these displays:

 Click the "Window" menu, select the teleprompter window>teleprompter full screen>teleprompter mirror (or use the display key for mirror image)

Menu Functions

You may distinguish these function points according to the letters.

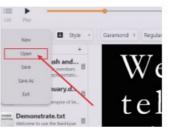

A. File

You may create a new file and open a local file in Word, TXT format

- New: You may edit the file as you wish
- · Editing interface

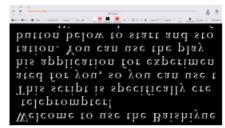

- Open: Select a file in Word, TXT format
- · Page display

B. Window
