# devolo 08772 WiFi Repeater+ ac Installation Guide

Contents

devolo 08772 WiFi Repeater+ ac

First steps

- Method A – configuration via the devolo Home Network app (page 3-4).
- Method B – configuration using WPS button (page 5-12).
- Your router's Wi-Fi network (SSID) must be visible.
- The MAC filter should be disabled during installation

Installation via App

Download the devolo Home Network app. An installation wizard will take you through the configuration step-bystep.
If you prefer to carry out the installation without the app, follow the steps in Part B.

Installation without App

Plug the adapter into an available power socket and wait until the home LED flashes white quickly (about 80 sec.).

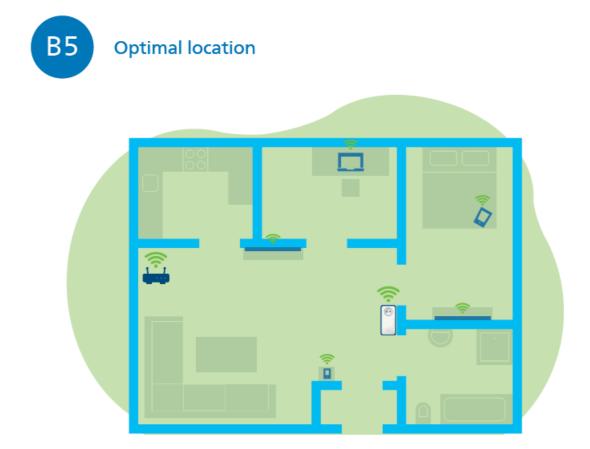

WPS Configuration

Press the WPS button on your devolo WiFi Repeater+ ac and then on your WiFi router within 2 minutes (refer to your router manual to find out how long).

Optimal location

The connection was successfully established. Position your devolo WiFi Repeater ac+ halfway between your Wi-Fi router and your Wi-Fi devices. That's it!
