Contents

**devolo Magic 2 LAN Triple Powerline Adapter**

Notice

Damage to the device from the environment. High temperature fluctuations and moisture can damage both the product and the power line.
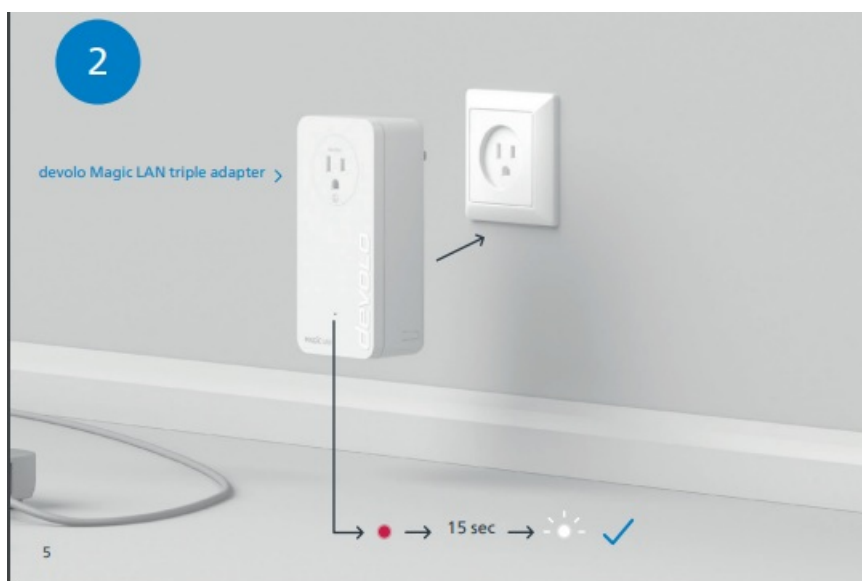

The device is for indoor use and in dry conditions only.
Set up, change and monitor: the intuitive devolo Home Network App for controlling devolo Magic adapters.

Information

Plug the devolo Magic LAN triple adapter into an available wall outlet and wait until the LED flashes white (approx. 15 seconds).

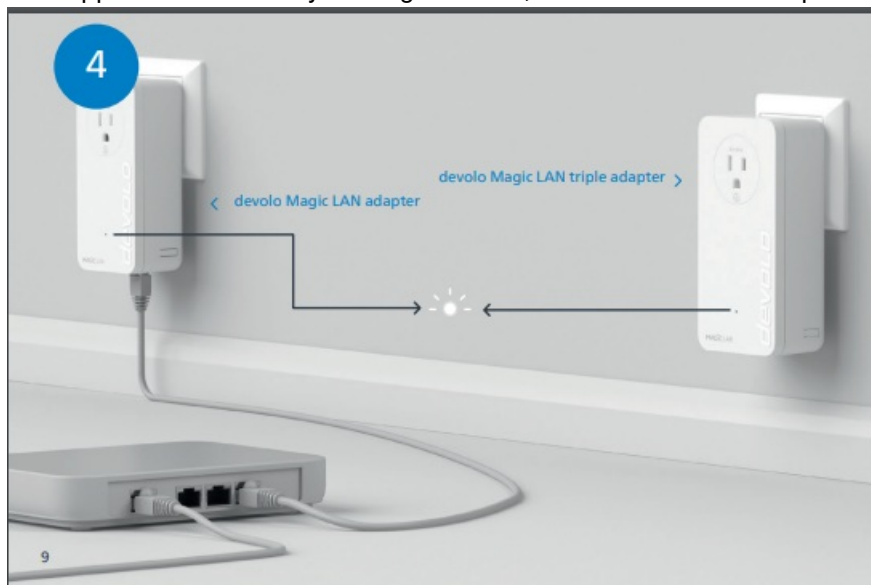

Within 3 minutes, press the button on the side of your devolo Magic LAN adapter which is connected to the router.
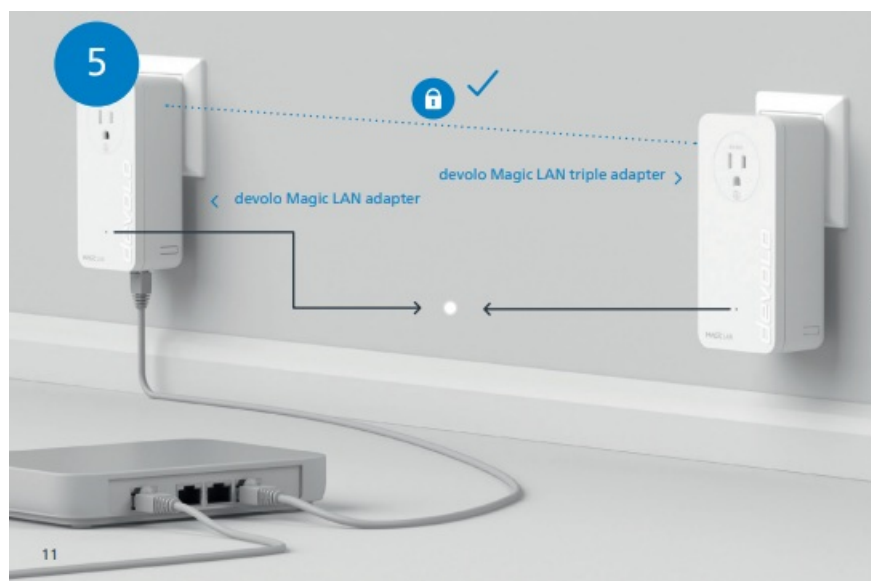

Caution

Tripping hazard from connected network cables. Tripping over the network cable can cause minor injuries and bruises. Lay the network cable with accessibility in mind. Ensure that the power outlet and all connected network devices are easily accessible. Ethernet cable (Cat.5e UTP) not for in-wall use

The encryption process happens automatically. During this time, the LEDs on both adapters flash white

The process is finished when the LEDs on all the devices turn solid white. The process takes a maximum of 3 minutes.
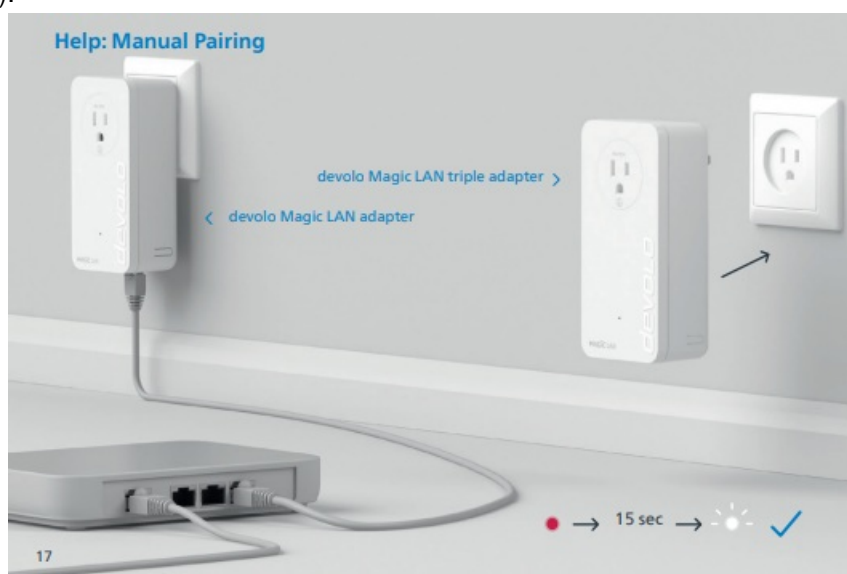

PLC button		
Time button is pressed	Action	LED behavior
1 second	Start pairing with other devolo Magic adapters	Flashing white
> 10 seconds	Reset devolo adapter to factory settings	Solid red

PLC LED	The devolo Magic LAN adapter ...	LED behavior
	... is working perfectly. It is connected to other devolo Magic adapters.	Solid white
	... is currently pairing with another adapter.	Fast flashing white
	... is not connected to the network*	Flashing red
	... is in standby mode.	Slow flashing white
	... is currently undergoing a software update.	Alternating white and red
	... has a poor Powerline connection.	Solid white followed by short flashing red
	... is currently in the start-up process. ... cannot see any other devolo Magic adapters.	Solid red
	... no longer has any LED function since it was disabled by the user.	None

Help

If automatic pairing during initial installation was unsuccessful, you can pair the Magic adapters manually. Plug the devolo Magic LAN adapter into an available wall outlet and wait until the LED flashes white (approx. 15 seconds).

Within 3 minutes, press the button on the side of your devolo Magic LAN adapter, which is connected to the router. Then press the button on your second Magic LAN adapter. When all of the LEDs light up white, pairing has been completed successfully.
