USER MANUAL (FCC STATEMENT)
FCCID:
IGTIQOYATALK

This is a copy of the page where the FCC statement is included: User manual: usermanual_talk_en_v1.2

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, them is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment of and on, the user is encouraged to coned interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Contents

RADIOFREQUENCY (RF) SAFETY INFORMATION:

Radiofrequency (RF) energy from cellular devices can interact with certain electronic devices and cause electromagnetic interference (EMI). To meet the requirements for compliance with exposure to radio frequencies, follow all regulations regarding the use of radio equipment.

Using your device near other electronic equipment may cause interference if the equipment is not properly protected. Follow all manufacturers' instructions and recommendations.

In general, observe the restrictions for any environment in which you use the device. Do not cover the device. To satisfy radio frequency exposure compliance requirements, the antenna and transmitter in the IQOYA TALK must be at least 20 cm from all persons and must not be used in conjunction with any other antenna or transmitter.

WIFI

This equipment has been tested and found to comply with the limits for a Class B digital service, pursuant to Part 15 of the FCC rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver to be connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radio Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.
