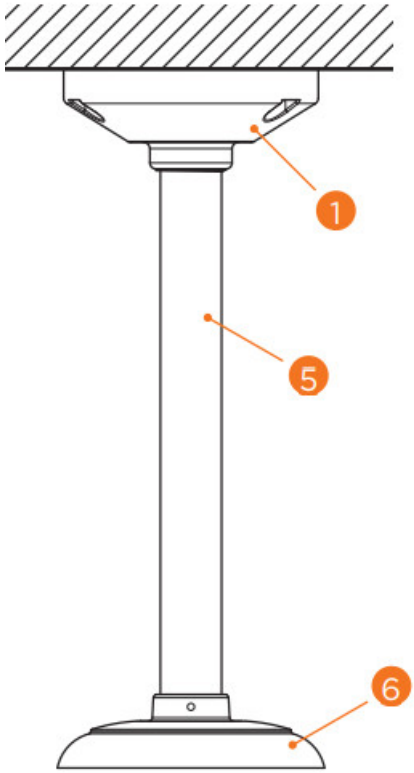
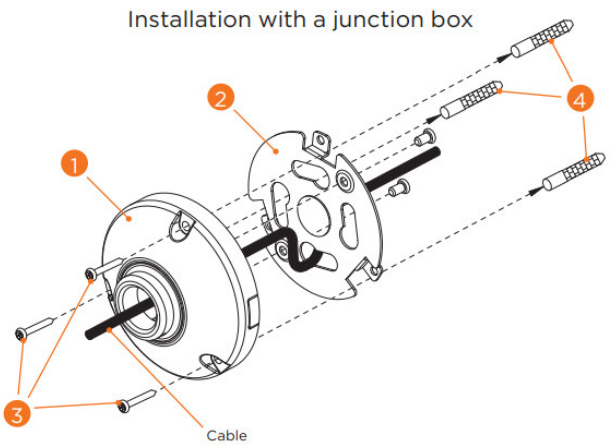
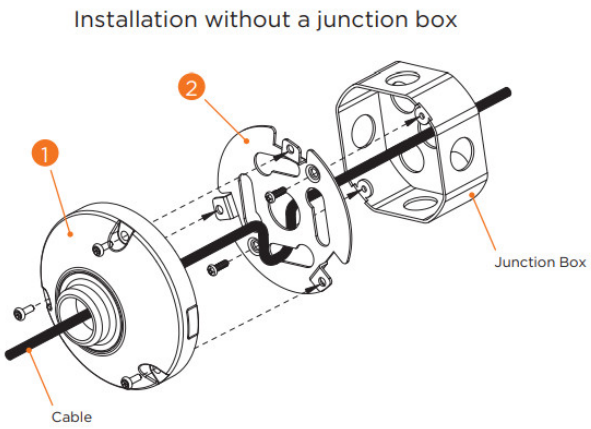
INSTALLING THE MOUNTING ACCESSORY

A. Attach the mount base (1) and plate (2) to the mounting surface using the supplied M6 tapping screws (3) and plastic bushings (4).
B. Wind Teflon tape around both threaded ends of the pipe (about 20 times) for sealing. If necessary, use a silicone rubber sealant to seal the area where the mount base and the pipe meet.
C. Fit the pipe (of which threads are covered by Teflon tape) into the mount base (1) and turn until it is securely fastened.
D. Pull all the required cables through the mount base (1) and pipe (5).
E. Align the dome adaptor (6) with the pipe and turn until it is securely fastened.
F. Fasten the mount base (1), dome adaptor (6) using the set screw.
G. Fasten the vandal-proof dome housing to the dome adaptor (6) using an M6 x 12 machine screw.



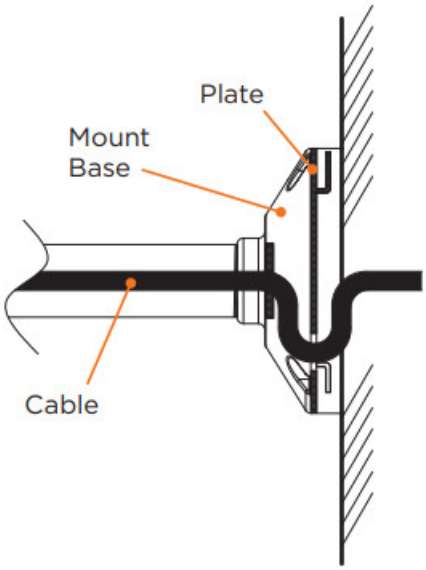
MOUNTING THE CAMERA TO THE MOUNTING ACCESSORY USING A JUNCTION BOX OR MOUNTING PLATE



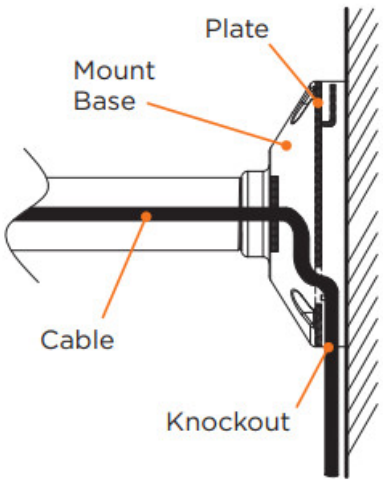


CABLING THE CAMERA

1. Cable passing through the wall



2. Cable on the wall (Remove the conduit knockout for cable passing through)



3. Cable passing through the wall with the junction box (Attention to the plate side)
