Safety notes

- When plugging and unplugging the cable, only grasp the plug and do not pull directly on the cable.
- Cables must not be kinked sharply or bent at tight angles, as this can damage the inner wires and lead to failures.
- Ensure that the cables are not under tensile load, as this can damage the insulation and the wires inside the cable.
- Ensure that cables are not laid in areas where they can be easily damaged mechanically.
- Cables should not be used in environments with extremely high or very low temperatures.
- Observe the product information on the maximum operating temperature of the cable
- Check cables regularly for visible damage such as cracks, kinks, or signs of wear.
- Defective cables should be replaced immediately to avoid failures, short circuits, or even electric shocks.
