DINGLILIGHTING WSCL08-30C Remote Control Ceiling Light

INTRODUCTION

With the DINGLILIGHTING WSCL08-30C Remote Control Ceiling Light, you can easily light up any room with this flexible and energy-efficient light. The sleek LED form of this light fixture gives off a lot of light (2400 lumens of brightness). The WSCL08-30C goes well in both home and business settings, and it comes with a remote control that makes it easy to change its color and features. The \$39.99 price tag on this ceiling light makes it both useful and stylish. This light, which was released on February 23, 2019, by W-LITE, has become popular because it is durable, has high-quality LED performance, and is easy to use. For reliable and stylish lighting, the WSCL08-30C is a great choice whether you want to add natural lighting to your living room, kitchen, or office.

Weight	3.06 Pounds
Item Model Number	WSCL08-30C
Date First Available	February 23, 2019
Manufacturer	W-LITE

WHAT’S IN THE BOX

- Remote Control
- Ceiling Light
- User Guide

PRODUCT OVERVIEW

Upgraded Driver

keep current steady & prevent chip damage

Brushed Nickel Frame

no pollution & anti-rust & long lifespan

High-Quality PMMA Lens

high light transmission & eye-friendly

High Power 2835 LED Chips

no need to purchase or replace light bulbs

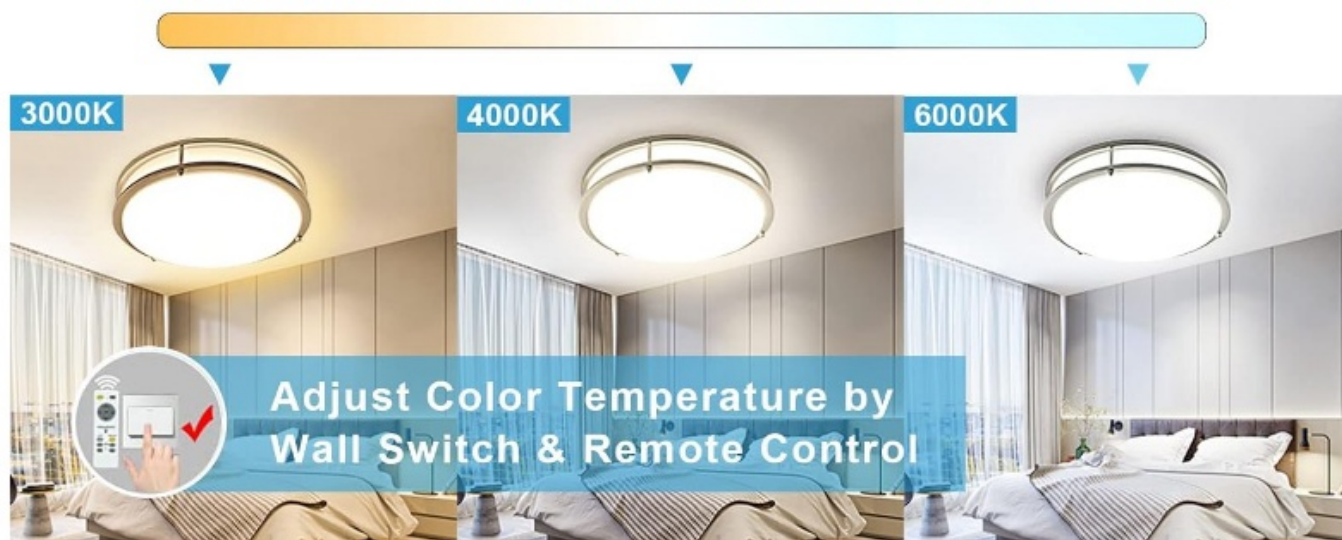

PRODUCT REMOTE

FEATURES

- **Super Bright LED Lighting:** The ceiling light is 30W bright and gives off 2400 lumens of light, which is great for lighting up medium-sized to big rooms.
- **Color Temperature Choices:** You can change the color temperature of the light to fit your needs. There are three choices: cool light (6000K), natural light (4000K), and warm light (3000K).

COLOR TEMPERATURE RANGE: 3000K-6000K

- **Dimmable:** The light can be dimmed smoothly from 20% to 100% brightness, so you can change how the room feels to your liking.
- **Remote Control:** The light can be changed in strength and color temperature from a distance thanks to a remote control.
- **Energy-Efficient LED Chips:** This ceiling light uses less energy than regular gas lamps because it has high-power 2835 LED chips. This can help lower your electricity bills.

- **Eye-Caring Design:** The LED bulb is made to have as little flicker and humming as possible, so it gives off even lighting that is easy on the eyes.
- **Long Lifespan:** LED technology makes sure that the lights last a long time, so they don't need to be replaced as often as other types of lighting.
- **Width:** It can cover rooms that are between 180 and 210 square feet, which makes it perfect for living rooms, dining rooms, bedrooms, and other rooms that are about that size.

- **Elegant and Modern Style:** The light has a sleek and modern look thanks to its brushed nickel finish and long-lasting white plastic lens.
- **Memory Function:** Should the light stay on for more than 10 seconds, the light will remember the last setting even if the power is turned off and on again.
- **Flush Mount Installation:** This light is made to be mounted straight on the ceiling for a smooth look. It works well in rooms with low ceilings.
- **Flexible Use:** It works well in living rooms, kitchens, bathrooms, bedrooms, basements, and halls, among other places.
- **Protective Acrylic Lens:** The strong white acrylic lens diffuses light evenly, making sure that the whole room is lit up without any harsh shadows.
- **Easy to Set Up:** You only need simple tools to set it up; you don't need professional help or complicated wiring.
- **12-Month Warranty:** For peace of mind, the light comes with a 12-month warranty on quality and a 30-day money-back guarantee.

SETUP GUIDE

- **Unbox the Product:** Carefully take the light fixture and radio control out of the box.
- **Make Sure the Power Is Off:** Before installing, make sure that the breaker for the old light fixture is turned off.
- **Mount the Ceiling Light:** To mount the light fixture to the ceiling, use the mounting tools that came with it. Because it is flush-mount, it should sit safely against the ceiling.
- **Wire the Fixture:** Connect the light fixture's neutral and live wires to the fixture's connections. The wires should go from the ceiling to the fixture.
- **Fix the Fixture:** Once the wiring is done, attach the fixture firmly to the bracket and make sure it is stable.
- **Install the Remote Control Battery:** To make the remote control work, put the right battery in it (usually a CR2025).
- **Turn on the Power:** Once the fixture is in place, flip the circuit switch to turn on the power again.
- **Pair the Remote:** Once the light is on, the remote should work with it immediately, but make sure it does what you say.
- **Change the Color:** To change the color of the light, use the remote to switch between warm (3000K), natural (4000K), and cool (6000K) light.
- **Adjust Brightness:** You can change the brightness by using the dimming feature on the remote to change the amount of brightness from 20% to 100%.
- **Set the Timer:** If possible, use the remote to set the light to turn off by itself after a certain amount of time.
- **Test Light Function:** Use the remote control to turn the light on and off and change its settings to test it.
- **Adjust Light Placement:** Make sure the light is placed so that it shines evenly throughout the room.
- **Set up the Memory Function:** After turning it on, let the light stay on for at least 10 seconds to use the memory function.
- **Finish Installation:** Before you finish installation, make sure all the connections are tight, the light works as it should, and no wires are showing.

CARE & MAINTENANCE

- **Regular Cleaning:** Use a soft, dry cloth to wipe down the light bulb and lens every so often to get rid of dirt and dust buildup.
- **Check the Remote Battery:** If the remote isn't working, check the CR2025 battery and change it if it's dead.
- **Avoid Dampness:** Make sure the light isn't exposed to too much dampness, as this could damage the fixture and make it work less well.
- **Look for Damage:** Check the fixture, wires, and remote control often for any signs of damage.
- **Tighten Mounting:** Make sure the light stays firmly attached to the ceiling. Tighten any screws or links that aren't snug.
- **Replace the LEDs:** If the LEDs burn out, which won't happen often because they last so long, follow the manufacturer's instructions for how to replace LEDs.
- **Turn Off When Not in Use:** If you don't need the light, turn it off when you're not using it. This will help the device last longer, especially if you're leaving for a long time.
- **Ensure Proper Airflow:** To keep the light bulb from getting too hot, don't block its airflow. Make sure there is enough room around the fixture for the heat to escape.
- **Keep the Connections Clean:** To make sure the system works safely and correctly, keep the wiring and connections clean and free of dust and other debris.

- **Memory Function Restart:** If the memory function doesn't seem to work, turn the fixture off for 10 seconds and then back on to restart it.
- **Ensure the Right Voltage:** The fixture should only be used within its maximum voltage (110V to 120V AC). If you use it with a higher power, it could break.
- **Avoid Hard Cleaners:** If you want to clean the acrylic lens, don't use hard chemical cleaners because they could scratch or damage the surface.
- **Check Settings Regularly:** Make sure the brightness and color temperature are still set properly and make any necessary changes.
- **Use a Soft Cloth on the Lens:** To keep the lens from getting scratched, clean it with a soft microfiber cloth.

TROUBLESHOOTING

Issue	Solution
Light does not turn on	Check if the light is properly connected to the power supply.
Light flickers or blinks	Ensure the lightbulb is correctly installed and the remote battery is fresh.
Remote control not responding	Replace the batteries in the remote control.
Light is dimmer than expected	Adjust the brightness settings on the remote or check the bulb for defects.
Light is too bright	Dim the light using the remote control.
Light stays on after turning off	Ensure the switch on the wall is fully off.
Remote control has limited range	Move closer to the light or replace remote batteries.
Light switches off unexpectedly	Check if there is a power surge or loose wiring.
The light is not changing colors (if applicable)	Make sure the remote has the color change function activated.
Strange noises from the light fixture	Tighten all loose screws on the fixture.
Remote turns on but does not adjust light	Reset the remote and re-pair with the light.
Light is not installed correctly	Double-check the installation manual for proper setup instructions.
Light operates intermittently	Ensure all electrical connections are secure and undamaged.
The light is overheating	Turn off the light and let it cool before turning it on again.
Light dims by itself after some time	Check for a faulty timer or setting on the remote.

PROS & CONS

Pros:

- Energy-efficient LED technology.
- Remote-controlled convenience for easy adjustment.
- High brightness (2400 lumens) suitable for large spaces.
- Sleek, modern design that fits various decors.

- The affordable price point for the features offered.

Cons:

- May not be suitable for very large rooms.
- Brightness may be too high for smaller areas.
- Requires a remote control, which could be lost.
- Not suitable for outdoor use.
- Installation may be tricky for some users.

WARRANTY

The DINGLILIGHTING WSCL08-30C Remote Control Ceiling Light typically comes with a **1-year manufacturer's warranty**, covering any defects in material or workmanship under normal usage. Please refer to the product's manual for specific warranty conditions and claim procedures.

FREQUENTLY ASKED QUESTIONS
