## Display link USB Graphics Software for Windows

## Windows Driver Downloads

Here you can download drivers for DisplayLink® USB graphics chipsets incorporated in your dock, adapter or monitor. We recommend to update to the latest driver to address any potential security issue, fix bugs, improve performance and add new features.

### Notes:

1. Your Original Equipment Manufacturer (OEM) may also provide software for your specific monitor, dock or adapter that differs from the DisplayLink releases. Please check their website for details.
2. Windows 10 S products using DisplayLink technology will get their device drivers either from OEM pre-installation or from Windows Update.

### Latest Official Drivers

DisplayLink USB Graphics Software for Windows Windows 10, 8.1, 7 Release: 10.1 M0   09 Mar 2021	<a href="#">Download</a> <a href="#">Release Notes</a>
DisplayLink USB Graphics Software for Windows Windows 8 Release: 9.2 M3   05 Nov 2019	<a href="#">Download</a> <a href="#">Release Notes</a>

## Installation

1. Refer to [www.displaylink.com/downloads](http://www.displaylink.com/downloads) to download/update the driver before using.
2. Select **“INDIVIDUAL INSTALLERS”** or **“CORPORATE INSTALLERS”** >> **“Windows”**
3. Open and Download Display Link USB Graphics Software for Windows .exe

## Display link USB Graphics Software for MAC OS

### DisplayLink macOS Software

DisplayLink Manager is a new way to enable your DisplayLink dock, adapter or monitor on macOS platforms. It's an application that combines our latest driver with features that streamline the setup of multiple displays up to 4K.

### DisplayLink Manager

DisplayLink Manager Graphics Connectivity Big Sur 11.0, Catalina 10.15 Release: 1.3   14 Feb 2021	<a href="#">Download</a> <a href="#">Release Notes</a>
---	---

### Legacy Releases

DisplayLink Manager Graphics Connectivity Big Sur 11.0, Catalina 10.15 Release: 1.1   13 Aug 2020	<a href="#">Download</a> <a href="#">Release Notes</a>
DisplayLink USB Graphics Software for macOS Catalina 10.15, Mojave 10.14 Release: 9.2.5   13 Aug 2020	<a href="#">Download</a> <a href="#">Release Notes</a>
DisplayLink USB Graphics Software for macOS Catalina 10.15, Mojave 10.14 Release: 5.2.4   26 May 2020	<a href="#">Download</a> <a href="#">Release Notes</a>

1. Refer to [www.displaylink.com/downloads](http://www.displaylink.com/downloads) to download/update the driver before using.
2. Select **“INDIVIDUAL INSTALLERS”** >> **“macOS”**
3. Open and Download Display Link Manager Graphics

**NOTE:** When asked whether you agree to install and enter the password, please click “Agree” and enter your fingerprint or password to install. Otherwise, the driver will fail to install.

**Enable “Screen Recording” to allow the Display Link Manager app to capture pixels and send them to your USB peripheral:**

1. Please select “Privacy” tab.
2. Navigate to “Screen Recording” in the list on the left.
3. Then tick the “Screen Recording” permission for Display Link Manager.

**NOTE:** For Apple Silicon (M1), it takes a higher level of protection of customer privacy requirements. MacBook with M1 chip, requires the user to permit “Screen Recording” in order for Display Link devices to work properly. The message is generated by the OS and the screens not actually being recorded by Display Link. Approving it enables the Display Link driver to access the pixels it needs to render a mirrored or extended screen and send the pixels over USB from your computer to the Display Link display. Display Link Manager does not store or record any screen content.
