DOADW

DOADW Stackable Storage Bins with Lids

Product Usage Instruction

- **Step 1: Take out all parts.**

Description: The image shows all components of the product laid out separately for assembly. This includes the main body of the item, as well as additional small parts such as handles and fasteners.

- **Step 2: Open the 4 sides and prop up.**

Description: The image depicts a person unfolding the four sides of the main body of the product and securing them in an upright position, presumably to form the product's structure.

- **Step 3: Attach the frame to the 4 sides.**

Description: The image illustrates a person attaching a frame to the four sides of the product, which have already been propped up, to provide stability and structure.

- **Step 4: Put the lid on.**

Description: The image shows a person placing the lid on top of the structure, completing the enclosure of the product.

- **Step 5: Add handles.**

Description: The image demonstrates a person attaching handles to the sides of the product, making it easier to carry or move.

- **Step 6: Install the pulley and finish.**

Description: The image portrays the final steps of assembly where a person is attaching a pulley system to the product, completing the installation process.

- **Step 7: Start to use.**

Description: The image depicts the fully assembled product, ready for use.

INSTALLATION INSTRUCTION

1. Take out all parts.

2. Open the 4 sides and prop up.

3. Attach the frame to the 4 sides.

4. Put the lid on.

5. Add handles.

6. Install the pulley and finish.

7. Start to use.

Specifications

Step	Description	Visual Description

5	Add handles.	Attaching handles to sides.
6	Install the pulley and finish.	Attaching pulley system.
7	Start to use.	Fully assembled product.

FAQ

- What tools are needed for assembly?**

No specific tools are depicted in the installation steps, suggesting that all necessary components are included and no additional tools are required.
- Is the lid secure once installed?**

Based on the images in the installation steps, the lid appears to fit securely on top of the main structure, though specific locking mechanisms are not shown.
- Can the product be moved easily after assembly?**

The addition of handles in step 5 implies that the product is designed to be portable and can be moved easily.
- Are the installation steps available in other languages?**

Yes, the provided instructions are written in both English and Spanish.
