**Dongguan Yooey Technology A01 Wireless Mouse**

## Introduction

Thank you for selecting this product! Your 2.4 Ghz Wireless Optical Mouse&Keyboard sets uses a newly developed radio frequency 2.4GHz wireless technology that replaces the traditional wired mouse.

## Product features

1. Radio frequency: 2.4GHz.
2. The mouse will stop working once the receiver is pulled out of the USB port or when the computer is turned off.
3. The mini USB receiver can be stored in the body of the mouse.
4. Using the most recent technology for optical sensors, the mouse works on most surfaces.
5. Mouse resolution: 800-1200-1600DPI.
6. Mouse:2\*AAA batteries, 3V/12mA. Keyboard:2\*AAA batteries, 3V/5mA.
7. The working distance: 10 meters.
8. Compatible with Windows 7/8/10 and MAC OS.

## Installing the batteries (Mouse&Keyboard)

### Provide 2\*AAA batteries

1. Open the battery cover;
2. Place the batteries taking into account the right polarity; Close the battery cover.

## Collecting the receiver

1. Detach the receiver from the battery jar of the mouse;
2. Plug the receiver into the USB port of the computer;
3. The mouse&Keyboard are ready for use.

**Caution**

Do not attempt to modify this item in any way. Do not let children play with this item.

**FCC Statement**

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
