### DORAN 3685 Truck TPMS Sensor

## **instructions**

### **1. General Description**

Tire pressure sensor is composed of an RF chip, battery, antenna, and Rf matching network. It is applied to monitor tire pressure, temperature, and acceleration and the tire data is transmitted via center frequency 433.92MHz.

### **2. Operation Functions**

Transmitter ID Programming: transmitter ID can be programmed for easy replacement Alarm Record Inequity: automatically record the 10 alarm records Standard Pressure Programming: standard pressure for each tire can be programmed on the monitor

### **3. Product Features**

Powerful functions include low-pressure alarms in 3 levels, fast leak alarms, and standard pressure settings etc. The monitor connects to continuous power to ensure full-time monitoring The design of the whole system matches the truck perfectly Simple operation for functional programming and inquiry

## **Federal Communications Commission (FCC) Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

### **RF exposure warning**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The equipment must not be co-located or operating in conjunction with any other antenna or transmitter.

## **Canadian Compliance Statement**

This device complies with Industry Canada license-exempt RSS. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference, including interference that may cause

## **IMPORTANT NOTE**

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment.
