Programming Instructions

Disclaimer: All currently programmed and new remotes must be reprogrammed to vehicle. Please have in hand at time of programming.

Once plugging in the programmer you will have 2 minutes to program all new and existing remotes to vehicle. After 1 minute your session will time out and your vehicle will no longer be in programming mode. Programmer will work for no more than 3 sessions.

1. Insert Key into ignition and turn to IGN ON. (Do not crank)
2. Insert Programmer into your vehicle's OBD2 Port. This port is typically located underneath the dashboard below the steering wheel. It may be covered by a faceplate that will easily pop off.
3. Once the Programmer is inserted, wait for a chime or orange light on the Programmer to come on. This will indicate that the unit is ready to program first remote.
4. Press and hold the lock and unlock button on the remote simultaneously until you hear a chime, buzzer, or the door locks cycle (approximately 10-15 seconds).
5. To program additional remotes, repeat step 4.
6. Remove Programmer when all remotes have been programmed.
