## Product introduction

AI voice mouse is a wireless mouse built-in voice input, voice translation, and voice search, which supports 112 languages voice typing and 112 languages translation.

## Hardware installation

1. Take out the USB signal receiver under the back of the mouse and insert it into the USB interface of Desktop computer / laptop computer / TV box.
2. While holding down the left and right mouse buttons, set the switch on the back to "ON", then match the computer).
3. The mouse automatically recognizes and installs the hardware driver. After installation, the left button, right mouse button, wheel button can be used.

**Remark :** If the mouse can't work and the light sensor flashes quickly, it may be caused by the battery is dead, please charge it as soon.

## Software Installation

1. Press and hold the wheel button for more than 5 seconds, the computer will automatically open the software download URL in the browser, and select the corresponding software according to the corresponding version of the computer.
2. After downloading, follow the prompts to install. then you can use it.

## Precautions

1. The mouse currently supports WIN7, WIN8, WIN10, XP system and MAC system.
2. When replacing the mouse on the same computer, after the hardware driver is installed, double-click the software program icon to use the mouse normally.

3. The software of the mouse may be updated sometimes.

If the mouse couldn't work normally, try to uninstall the computer software program and reinstall the software program to use it.

4. Download the voice mouse software from <http://www.dosmono.corehold.com/index.php>

5. After the software is downloaded and installed, please run the program. When the icon in the lower right corner of the screen is colored, it means that the program is running normally. When it is gray, please proceed as follows:

(1) Please check if the USB receiver is plugged in.

(2) Please try running the application again.

6. This mouse supports 112 languages voice typing and voice translation: Mandarin, English, Cantonese, Japanese, Korean, Russian, French, Spanish, Arabic, Portuguese, Bulgarian, Czech, Danish, German, Greek, Estonian, Finnish, Hungarian, Indonesian, Italian, Latin, Dutch, Romanian, Slovenian, Polish, Swedish, Thai, Malay, Vietnamese, etc.

7. If the program is blocked by security software (360 or Kingsoft Internet Security, etc.) installation or accidental blocking, please close the anti-virus software and re-install. It is recommended that you add the installation program to the white list.
