INSTALLATION

Tablet Installation

Keyboard Installation

- Store your Tablet into the keyboard case and fold it to carry around.

TROUBLESHOOTING

If the keyboard doesn't work, please check:

1. If its battery has run out, if yes, please charge it immediately.
2. If the Bluetooth connection fails, turn off the keyboard and restart it after 10 seconds, and the keyboard will reconnect to your device automatically. If the problem still exists, go to iPad's Settings > Bluetooth > My Devices to delete "Dracool Keyboard". Then reconnect the keyboard according to the previous connection steps.
3. If the Bluetooth connection still fails, press ☐ and for 3 seconds to restore factory settings. Then reconnect the keyboard.

4. Or you can restart your Tablet and then check if the keyboard can work normally.

Friendly Reminder

- The keyboard is built with rechargeable polymer battery. If you're not going to use the keyboard for a long time, we suggest turning it off to avoid power drain and extend its battery life.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference.
2. this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

- The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
