**DrayTek Vigor3910 Series Multi-WAN Security Router**

### **Intellectual Property Rights (IPR) Information**

Copyrights © All rights reserved. This publication contains information that is protected by copyright. No part may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language without written permission from the copyright holders.

Trademarks The following trademarks are used in this document:

- Microsoft is a registered trademark of Microsoft Corp.
- Windows 8, 10, 11 and Explorer are trademarks of Microsoft Corp.
- Apple and Mac OS are registered trademarks of Apple Inc.
- Other products may be trademarks or registered trademarks of their respective manufacturers.

### **Safety Instructions and Approval**

#### **Safety Instructions**

- Read the installation guide thoroughly before you set up the router.
- The router is a complicated electronic unit that may be repaired only by authorized and qualified personnel. Do not try to open or repair the router yourself.
- Do not place the router in a damp or humid place, e.g. a bathroom.
- Do not stack the routers.
- The router should be used in a sheltered area, within a temperature range of +5 to +40 Celsius.
- Do not expose the router to direct sunlight or other heat sources. The housing and electronic components may be damaged by direct sunlight or heat sources.
- Do not deploy the cable for LAN connection outdoor to prevent electronic shock hazards.
- Keep the package out of reach of children.
- When you want to dispose of the router, please follow local regulations on conservation of the environment.

#### **Warranty**

We warrant to the original end user (purchaser) that the router will be free from any defects in workmanship or materials for a period of two (2) years from the date of purchase from the dealer. Please keep your purchase receipt in a safe place as it serves as proof of date of purchase. During the warranty period, and upon proof of purchase, should the product have indications of failure due to faulty workmanship and/or materials, we will, at our discretion, repair or replace the defective products or components, without charge for either parts or labor, to whatever extent we deem necessary to restore the product to proper operating condition. Any replacement will consist of a new or re-manufactured functionally equivalent product of equal value, and will be offered solely at our discretion. This warranty will not apply if the product is modified, misused, tampered with, damaged by an act of God, or subjected to abnormal working conditions. The warranty does not cover the bundled or licensed

software of other vendors. Defects which do not significantly affect the usability of the product will not be covered by the warranty. We reserve the right to revise the manual and online documentation and to make changes from time to time in the contents hereof without obligation to notify any person of such revisions or changes.

## Package Content

Take a look at the package content. If there is anything missed or damaged, please contact DrayTek or dealer immediately.

The type of the power cord depends on the country that the router will be installed.

## Panel Explanation

## LED

LED		Status	Explanation
PWR		On	The router is powered on.
		Off	The router is powered off.
ACT		Blinking	The system is active.
		Off	The system is hanged.
USB		On	The USB device is installed and ready.
		Off	No USB device is installed.
SFP+		On	The fiber connection is established.
		Off	No fiber connection is established or the system is hanged.
P3 ~ P12	Left	On	The Ethernet link is established on corresponding port.
		Off	No Ethernet link is established.
		Blinking	The data is transmitting.
	Right	On	The Ethernet link is established on corresponding port with 1G Mbps or above.
		Off	The Ethernet link is established on corresponding port with less than 1G Mbps.

## Connectors

Interface	Description
USB1 / USB2	Connector for the USB device.
Console	Provided for technician use.
SFP+ (P1~P2)	Connector for SFP module with the rate of 10G/1G bps.
2.5GBase-T (P3~P4)	Connector for remote network devices or local network devices (WAN/LAN) with the rate of 2.5G/1G/100M/10M bps.
GbE P5~P8	Connectors for remote network devices or local network devices (WAN/LAN) with the rate of 1G/100M/10M bps.
GbE P9~P12	Connector for local network devices (LAN) with the rate of 1G/100M/10M bps.
	The Factory Reset button is used to restore the default settings. Turn on the router ( <b>ACT</b> LED is blinking). Press the hole and keep for more than 5 seconds. When you see the <b>ACT</b> LED begins to blink rapidly than usual, release the button. Then the router will restart with the factory default configuration.
	Connector for a power cord. ON/OFF – Power switch.

## Hardware Installation

This section will guide you to install the router through hardware connection and configure the router's settings through web browser.

### Connecting Device

Before starting to configure the router, you have to connect your devices correctly.

1. Connect a modem to any WAN port of Vigor3910 with Ethernet cable (RJ-45) to access Internet.
2. Connect the other end of the cable (RJ-45) to the Ethernet port on your computer (that device also can connect to other computers to form a small area network). The LAN LED for that port on the front panel will light up.
3. Connect a server/router (depends on your requirement) to any WAN port of Vigor3910 with Ethernet cable (RJ-45). The WAN LED will light up.
4. Connect the power cord to Vigor3910's power port on the rear panel, and the other side into a wall outlet.
5. Power on the device by pressing down the power switch on the rear panel.  
The PWR LED should be ON.
6. The system starts to initiate. After completing the system test, the ACT LED will light up and start blinking.  
Below shows an outline of the hardware installation for your reference.

### Rack-Mounted Installation

The Vigor3910 Series can be mounted on the shelf by using standard brackets shown below.

1. Fasten the rack mount kit on both sides of the Vigor router using specific screws.

2. Then, install the Vigor router (with rack mount kit) on the 19-inch chassis by using other four screws.

## Software Configuration

To access Internet, please finish basic configuration after completing the hardware installation.

### Quick Start Wizard for Network Connection

The Quick Start Wizard is designed for you to easily set up your router for Internet access. You can directly access the Quick Start Wizard via Web User Interface. Make sure your PC connects to the router correctly.

### Note

You may either simply set up your computer to get IP dynamically from the router or set up the IP address of the computer to be the same subnet as the default IP address of Vigor router 192.168.1.1. For the detailed information, please refer to -Trouble Shooting of the user's guide.

Open a web browser on your PC and type <http://192.168.1.1>. A pop-up window will open to ask for username and password. Please enter "admin/admin" as the Username/Password and click Login.

**Note** If you fail to access to the web configuration, please go to "Troubleshooting" on User's Guide for detecting and solving your problem.

Now, the Main Screen will pop up.

You have to select the appropriate Internet access type (PPPoE, Static IP or DHCP) according to the information from your ISP.

Here we take PPPoE and DHCP modes for WAN connection as examples.

## For PPPoE Connection

1. Choose WAN1 as WAN Interface and click the Next button; you will get the following page

Quick Start Wizard

---

Connect to Internet

**WAN 1**  
Select one of the following Internet Access types provided by your ISP.

☒ PPPoE  
☐ Static IP  
☐ DHCP

< Back   Next >   Finish   Cancel

2. Select PPPoE and click Next to get the following page.

Quick Start Wizard

---

PPPoE Client Mode

**WAN 1**  
Enter the user name and password provided by your ISP.

Service Name (optional)

Username

Password

Confirm Password

< Back   Next >   Finish   Cancel

3. Enter the Username/Password provided by your ISP. Then click Next for viewing the summary of such connection.

Quick Start Wizard

---

Please confirm your settings:

WAN Interface:	WAN1
Physical Mode:	Ethernet
Internet Access:	PPPoE

Click **Back** to modify changes if necessary. Otherwise, click **Finish** to save the current settings and restart the Vigor router.

< Back   Next >   Finish   Cancel

4. Click Finish. A page of Quick Start Wizard Setup OK!!! will appear. Then, the system status of this protocol will be shown.

## Quick Start Wizard Setup OK!

5. Now, you can enjoy surfing on the Internet.

### For DHCP Connection

1. Choose WAN1 as WAN Interface and click the Next button; you will get the following page.

Quick Start Wizard

---

Connect to Internet

**WAN 1**  
Select one of the following Internet Access types provided by your ISP.

☐ PPPoE  
☐ Static IP  
☒ DHCP

< Back   Next >   Finish   Cancel

2. Select DHCP and click Next to get the following page.

Quick Start Wizard

---

DHCP Client Mode

**WAN 1**  
If your ISP requires you to enter a specific host name or specific MAC address, please enter it in.

Host Name    (optional)  
MAC    -  -  -  -  -  (optional)

< Back   Next >   Finish   Cancel

3. Enter the hostname and / or MAC address provided by your ISP. Then click Next for viewing summary of such connection.

Quick Start Wizard

---

Please confirm your settings:

WAN Interface:	WAN1
Physical Mode:	Ethernet
Internet Access:	DHCP

Click **Back** to modify changes if necessary. Otherwise, click **Finish** to save the current settings and restart the Vigor router.

< Back   Next >   Finish   Cancel

4. Click Finish. A page of Quick Start Wizard Setup OK!!! will appear. Then, the system status of this protocol will be shown.

## Quick Start Wizard Setup OK!

5. Now, you can enjoy surfing on the Internet.

### Customer Service

If the router cannot work correctly after trying many efforts, please contact your dealer for further help right away. For any questions, please feel free to send e-mail to [support@draytek.com](mailto:support@draytek.com).

Be a Registered Owner

Web registration is preferred. You can register your Vigor router via <https://myvigor.draytek.com>.

### Firmware & Tools Updates

Due to the continuous evolution of DrayTek technology, all routers will be regularly upgraded. Please consult the DrayTek web site for more information on newest firmware, tools and documents. <https://www.draytek.com>

For any question, please feel free to contact DrayTek technical support at [support@draytek.com](mailto:support@draytek.com) for further information.

### EU Declaration of Conformity

We DrayTek Corp. , office at No.26, Fushing Rd., Hukou, Hsinchu Industrial Park, Hsinchu 303, Taiwan, declare under our sole responsibility that the product

- Product name: Multi-WAN Security Appliance
- Model number: Vigor3910
- Manufacturer: DrayTek Corp.
- Address: No.26, Fushing Rd., Hukou, Hsinchu Industrial Park, Hsinchu 303, Taiwan. is in conformity with the relevant Union harmonisation legislation:

EMC Directive 2014/30/EU, Low Voltage Directive 2014/35/EU and RoHS 2011/65/EU with reference to the following standards

Standard	Version / Issue date
EN 55032	2015+AC:2016 class A
EN 61000-3-2	2014 Class A
EN 61000-3-3	2013
EN 55024	2010+A1:2015
EN 62368-1	2014/AC:2015
EN IEC 63000:2018	2018

### Declaration of Conformity

### Regulatory Information

#### Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and

2. This device may accept any interference received, including interference that may cause undesired operation.
