0.2mm

Low   High

Set sensitivity of Upstroke

0.2mm

Low   High

Don't Forget to Click the 'Save to Keyboard' Button at the end

Save to Keyboard

About The Magnetic Switch
- Magnetic Switches utilize Hall Sensors to determine the distance a key is pressed by measuring the strength of the magnetic field.
- It makes it possible to customize the trigger point (actuation point) to your preferred level of pressure and distance, accommodating all typing styles.

- Whether you bottom out or barely touch the keys, we've incorporated adaptive typing to provide noticeable comfort improvement for everyone.
- MS doesn't rely on physical contact, which can wear down the key over time. These switches can be pressed hundreds of millions of times.
- This is vastly superior to the metal contacts of conventional switches.
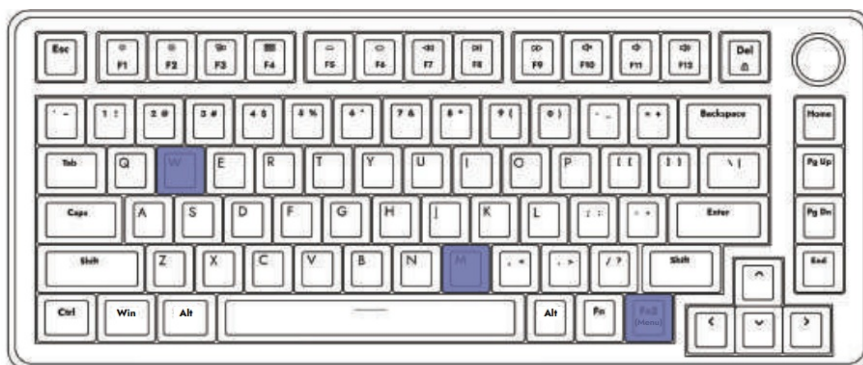

How To Control The Backlight Effect
The backlight effect can be changed by key combination as follow:

- **Fn2 (Menu)+ Tab:** Change the backlight color (Only for certain effects)
- **Fn2 (Menu)+** Previous backlight effect
- **Fn2 (Menu)++** Next backlight effect
- **Fn2 (Menu)+1** Increase the backlight brightness
- **Fn2 (Menu)+** Decrease the backlight brightness

How To Switch The Operating Layout

The operating layout of the A75 can be changed by key combination as follow:

Fn2 (Menu)+ M: Switch to the Mac OS
Under the MacOS layout, the function keys on F1 to F12 are available without other driver program.

Fn2 (Menu)+ W: Switch to the Windows
Under the Windows layout, the function keys would retain original key value

Control The Volume With The Knob

Whether it's MacOS or Windows layout, volume of the computer can be controlled directly by turning the knob.

You can also play or pause music/video by pressing the knob.
