INSTALLATION INSTRUCTIONS

Professional installation by an authorized DS18 dealer is highly recommended!

Otherwise, the performance of your new gear may not be satisfactory. In the event that you decide to do your own installation, please read, and follow this manual carefully.

Failure to do so may compromise the integrity of this product, your automobile, and possibly void the product warranty.

Use this Subwoofer Box with an external Monoblock subwoofer amplifier that can handle 1 Ohm load impedance and a maximum of 800W RMS continuous power, otherwise the amplifier or the Subwoofer can be damaged.

In case that you need to install an amplifier please refer to the amplifier's instruction manual to perform the installation of the amplifier before the use this Subwoofer Box.

Do Not Connect this directly to the factory radio or aftermarket radio speaker output. This will not be enough power for the subwoofers and could be bad for the radio's amplifier if is not 1 ohm stable.

Secure the subwoofer box with a strap or bracket to screw it down in case this box is loose on your trunk or a SUV cargo area to avoid this moving around which will damage the Subwoofer or box itself. In case of accelerating or hard braking this will reduce the possibility of movement! Major injuries may occur in case of an accident if this is not secured properly.

If you already have installed the amplifier then follow these simple steps:

1. Connect the subwoofer box to the amplifier using a minimum 12Ga speaker wire and make sure the polarity (+) and (-) is correct, otherwise the sound will be affected.
2. Now you are ready to play it for the first time. It is best to leave the gain all the way down at the start. Now, start with the head until volume low and work your way up.
3. Now you can tune the amp. We recommend using the Low Pass Filter at 120Hz or lower depending on your system. Take your time and make only one adjustment at a time. It may take some time to get the system fully adjusted. During this time the amp is drawing current from the battery. You should check the battery voltage from time to time and re-charge it if it gets low. That's it! You are done Now have fun!!

SPECIFICATION

GENERAL

Speaker type SizeDual 10" Subwoofers (GEN-X104D)
 Total RMS Power Handling800 WATTS
 Total MAX Power Handling 1600 WATTS
 Sensitivity (1w/1m) 93 dB
 Frequency Response.....25Hz-250Hz
 Recommended Lo Pass Crossover120 Hz

SPEAKER SPECIFICATIONS

Voice Coil Diameter2" / 50.8 mm
 Voice Coil Former MaterialBlack Aluminum / Aluminio Negro
 Winding MaterialSV
 Cone Material Paper & Fiber Glass
 Dust Cap Material PPI
 Surround Material Foam / Espuma
 Basket MaterialSteel / Acero
 Magnet Material..... Ferrite / Ferrita
 Magnet Weight 66 Oz

BOX SPECIFICATIONS

Internal Volume72.6L / 2.6ft3
 Port Tune..... Fb..... 35 Hz
 Load Configuration.....Parallel / Paralelo
 Box TypeFront Ported / Puerto Frontal
 Box Material1/2" / 15mm MDF
 Finish MaterialBlack Carpet / Tapete Negro
 -3dB Dropping Point..... F3 29 Hz

MEASUREMENT

Height13.78" / 350 mm
 Width30.71" / 780 mm
 Depth 1..... 11" / 280 mm
 Depth 2..... 14" / 356 mm
 Port Dimensions (W/H/Length) / 2 x 1.96" x 13" x 23.2" / 50 x 330 x 590 mm
