dsafe 210406 Export Dial Lock

How to unlock

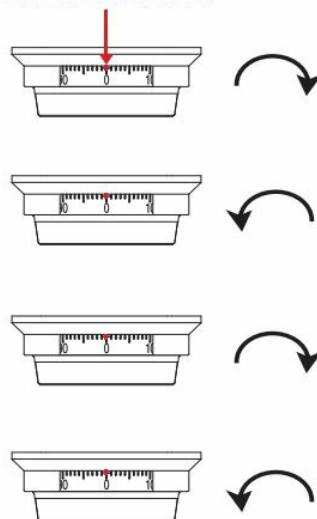

The combination of your safe is set as follows :

NUMBER	ROTATION	TURNS
	Right	4
	Left	3
	Right	2
	Left	1

It is necessary to accurately dial the four numbers shown.

- **A.** In the correct sequence
- **B.** In the correct rotation, and
- **C.** For the correct number of turns

OPENING INDEX

- **Step 1.** The first number must pass the opening index mark over 3 times in a clockwise (right) direction and stop on the fourth full turn.
- **Step 2.** The second number must pass the opening index mark twice in a counter-clockwise (left direction and stop on the third full turn.
- **Step 3.** The third number must pass the opening index mark only once in a clockwise (right) direction and stop on the second full turn.
- **Step 4.** The fourth number must not pass the opening index mark turning counter-clockwise (left and it must stop the first time it appears.

- **Step 5.** Now turn the key in the cylinder lock to the right and open the door.

How to lock

- Step 1. Close the door
- Step 2. Turn the key to the left and remove it.
- Step 3. Spin the combination lock over 3 times in any direction.
 - Please do not lose the combination only you know the code.
 - To improve products constantly, the manufacturer reserves the right to alter the specifications without prior notice. Printed in Korea, April. 8, 2021 REV. 6
