Ducky Tinker75 Pre Built Customisable Keyboard

Specifications

- Keyboard Model: Ducky ProjectD Tinker75 Pre-Built Customisable Keyboard
- Switches: Cherry MX
- Keycaps: PBT double-shot
- Form Factor: SF 75% TKL
- Layout: Nordic ISO
- Connectivity: Detachable USB-C cable
- Backlighting: RGB LEDs

Product Usage Instructions

Premium Materials

The Ducky ProjectD Tinker75 Customisable Keyboard is constructed from premium materials for durability and exceptional acoustics. The casing is made from durable ABS plastic, the baseplate from FR-4 laminate-grade glass epoxy, and a rubber gasket and Poron foam for switch cushioning.

Complete Keyboard

The keyboard features a 75% SF form factor with a dedicated F-key row in a Nordic ISO layout. It is QMK/VIA enabled for functionality layering and space-saving. The RGB LEDs provide vibrant illumination. Use the detachable USB-C cable for connectivity and adjust the typing angle with the three-stage stand.

FAQ

- **Q: Can I customize the keycaps on the Ducky ProjectD Tinker75?**
    - A: Yes, the keyboard comes with PBT double-shot keycaps that can be easily replaced with other compatible keycap sets for customization.
- **Q: Is the Ducky ProjectD Tinker75 compatible with Mac computers?**
    - A: Yes, the keyboard is compatible with both Windows and Mac operating systems, providing a versatile option for different users.

Ducky Tinker 75 – Prebuild

The Ducky ProjectD Tinker75 Pre-Built Customisable Keyboard gives you the best of both worlds. This keyboard is fully pre-built but can still be fully customised and tailored to meet your exact needs. Out of the box, it is constructed from premium materials to enhance durability and generate sensational acoustics. Equipped with Cherry MX switches and PBT double-shot keycaps, you can enjoy smooth, precision gaming with the ProjectD Tinker75.

DUCKY PROJECTD TINKER75 PRE-BUILT

- Pre-built mechanical gaming keyboard utilising the Ducky ProjectD Tinker75 frame
- Constructed from premium materials for ultimate typing experience

- Cherry MX switches and PBT double shot keycaps
- RGB backlighting for stunning effects
- Hot-swappable and Customisable keyboard
- Detachable USB-C cable and three-stage stand

PREMIUM MATERIALS

For robust construction, the Ducky ProjectD Tinker75 Customisable Keyboard is manufactured from premium quality materials. Each layer has been carefully selected to provide a better typing experience whilst still offering customization.

The casing is manufactured from durable ABS plastic, providing a solid frame to encase the rest of the components. Next, the baseplate is manufactured from FR-4, a laminate-grade glass epoxy. It is a versatile thermoset plastic that has a high stiffness to weight ratio. A rubber gasket is utilized for mounting switches. To cushion the switches as you type is a layer of Poron foam, providing a dampening effect to soften the click and exceptional typing feel.

HOT SWAP

Thanks to the socket gasket mounting, you can hot-swap the switches used in the Ducky ProjectD Tinker75 – no soldering required. There are three prebuilt models, each utilising Cherry MX switches.

As standard, the ProjectD Tinker75 features black PBT double-shot keycaps with milky white legends. A classic aesthetic that seamlessly blends into the black and white frame. PBT plastic is highly durable, retaining its original finish without showing signs of wear, tear, or shine. Alternatively, you can swap out the keycaps, too, for a style that best suits your gamer style.

COMPLETE KEYBOARD

The Ducky ProjectD Tinker75 Pre-Built Customisable Keyboard utilises Ducky's SF form factor. This is a 75% sized TKL keyboard with a dedicated F-key row. It is QMK/VIA enabled, however, so you can layer functionality

and still save on space. These keys are arranged in a Nordic ISO layout and illuminated by vibrant RGB LEDs.

To connect to your gaming PC, this keyboard is equipped with a detachable USB-C cable, which also increases portability. Enhancing your comfort, the Ducky ProjectD Tinker75 has a three-stage stand, so you can find the perfect typing angle for your needs.
