**DUSTSILVER K61 Mechanical Keyboard**

## Introduction PRODUCT

The DUSTSILVER K61 Mechanical Keyboard is designed for contemporary young people. The product is made in China and is available in a Dustsilver color. The keyboard comes with a Type-C connection and can be used with Windows/Mac OS/Android/IOS. The keyboard also features lighting functions that allow you to customize the light effect and switch between different light modes.

## Specification

- Size: mm\*mm\*.mm
- Weight: g
- Keys:
- Connection Mode: wired Type-C, wireless ./.G, wireless VO
- DC: V
- mA: WAC
- Support System: Windows/Mac OS/Android/IOS

## product Lighting Function

The keyboard features customizable lighting functions that allow you to switch between different light modes. The light effect can be changed through key combinations, and a driver needs to be downloaded for customizing the light effect. The keyboard also has different speed and luminance settings, and it goes into dormancy mode after a certain period of inactivity. There are different light indication modes for different functions like pairing, reconnecting, low battery, and full charge.

## product Light Effect Settings

The keyboard has two different light effect settings:

- Default: This setting has gear 3 for speed and gear 3 for luminance.
- Customized: For this setting, a driver needs to be downloaded for operation.

## Sleep Mode

The keyboard has two different sleep modes:

- **Light Sleep:** The keyboard goes into light sleep mode and turns off after a certain period of inactivity.
- **Deep Sleep:** The keyboard goes into deep sleep mode and turns off after a longer period of inactivity.

## **Driver Download**

The driver for customizing the light effect can be downloaded from the following address: [dustsilver.com](https://dustsilver.com). You can also use the QR code on the bottom page of the manual to enter the download page.

## **product Light Indication**

The keyboard has different light indication modes for pairing, reconnecting, low battery, and full charge. The light indication is located in different positions on the keyboard for different functions.

## **Product Usage**

The K61 Mechanical Keyboard can be used with Windows/Mac OS/Android/IOS. The keyboard can be connected through wired Type-C or wireless ./.G or VO.

## **Lighting Function Usage**

You can switch between different light modes using the following key combinations:

- CapsLock + Z/X/C/V: Switch between different light modes.
- Fn + Backspace: Adjust light luminance.
- Fn + Z/X/C/V/S: Adjust light speed.

To customize the light effect, download and use the driver from [dustsilver.com](https://dustsilver.com) or use the QR code on the manual page to enter the download page.

## **Sleep Mode Usage**

The keyboard goes into sleep mode after a certain period of inactivity. It goes into light sleep mode first and turns off after a certain period. For deep sleep mode, the keyboard turns off after a longer period of inactivity.

## **Driver Download Usage**

Download the driver for customizing the light effect from [dustsilver.com](https://dustsilver.com) or use the QR code on the manual page to enter the download page. After downloading, follow the instructions to install and use the driver.

## **Light Indication Usage**

The keyboard has different light indication modes for pairing, reconnecting, low battery, and full charge. The light indication is located in different positions on the keyboard for different functions.

## **BRAND CONCEPT**

DUSTSILVER, it aims better to cater to the user group of the younger generation and design each product with a cautious attitude toward artistic creation, making it more suitable for the life and work of contemporary young people. you equipment is more than just desktop dress up!

PRODUCT SPECIFICATION

- **SIZE:** 291mm\*101mm\*36.5mm
- **WEIGHT:** 589g
- **KEYS:** 61
- **CONNECTION MODE:** wired (Type-C) ;BTwireless (3.0/5.0) ;2.4Gwireless
- **VOP:** DC3.7V
- **WAC:** <300mA
- **SUPPORT SYSTEM:**Windows/Mac OS/Android/IOS

LIGHTING FUNCTION

LIGHT EFFECT

Light effect	The original factory provides 20 light efficiency options, of which 17 can be switched through key combination, and 3 need to download and use the driverSwitch; Support customized light effect, and need to download the driver for operation.
Speed	Default 4th gear, factory 4th gear
Luminance	Default 5th gear, factory maximum brightness
Dormancy	Light sleep: turn off the light after 2 minutes of keyboard inactivity Deep sleep: no keyboard operation for 30 minutes
Drive	Driver download address: <a href="http://dustsilver.com">dustsilver.com</a> , or identify the QR code on the bottom page of this manual to enter the download page

Light indication

	Indicator position	Pair	Reconnect	Connection succeeded
BT1	Z	Lights flash quickly	Light flashing slowly	The light stays on for 2 seconds and goes out
BT2	X	Lights flash quickly	Light flashing slowly	The light stays on for 2 seconds and goes out

## FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

#### Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
