How to Install Dynalink APK File on Android SOP

Step 0.
Before installing the Dynalink Android APP, please be careful not to download the wrong Dynalink Android APP as the below icon. Our Dynalink APP for the router is free.

Correct APP

DYNALINK - Easy to use 4+
WiFi Router/Mesh APP
Dyna link
★★★★½ 4.3
Free

Wrong APP

DynaLink
DynaLink
$1.99

Step 1. Download the Dynalink APK file (Dynalink_v2.0.19_release_2024-01-16.apk) to your Android device, then directly refer to Step 5 or your PC. You can simply save it to the desktop.
**Step 2.** Connect your Android device to the PC using a USB cable. At this point, it will ask you if you want to charge your device or connect it as a 'Media device', select 'Media device'.
Step 3. Navigate to the APK file on the PC and copy the APK file into a folder on your Android device. It can be stored in the internal storage or the external storage of your Android device.
**Step 4.** After that, please open the Android device's file manager APP to locate the APK file. It's usually called My Files, or File Browser, and you'll typically find it in the app drawer.
Note: If there is no file manager app installed yet, you can download a free file manager app from the Play Store, such as ES File Explorer.
Step 5. On the Android device, tap on the APK file you just copied.

Step 6. Then it will ask if you want to install the app, just click the 'INSTALL' button and proceed

Step 7. Once it is finished, tap the 'OPEN' button and the Dynalink APP is ready to use.
