**EasyAcc FSZD02-21 Rechargeable Handheld Fan**

## INTRODUCTION

The EasyAcc FSZD02-21 Rechargeable Handheld Fan is a strong, small fan that's made to keep you cool on sticky, hot days. With its slim and small design, this fan is easy to take with you indoors and outdoors. With its 4-speed settings and 10000mAh power bank, it keeps you comfortable for long amounts of time, whether you're at work, on the road, or doing something fun outside. The fan also has an amazing battery life of 9–53 hours, which means it can be used all day. It has LED lights to make it easier to use and more useful, especially when there isn't much light. When you consider that it only costs **\$28.69**, the EasyAcc FSZD02-21 is a great fan that will work perfectly. It is very useful because it can be folded up and charged via USB. It also has a button control for easy use. EasyAcc is a well-known name in portable power solutions, and they made the fan.

### PRODUCT SIZE

## FEATURES

- **4 Speed Settings:** It has 4-speed settings so you can choose how much cooling you want, from light breezes for the inside to strong winds for the outside.
- **Better battery life:** up to 53 hours of use on the lowest setting, great for long trips or activities outside.
- **Use as a Power Bank:** The fan can also be used as a 10,000mAh power bank to charge your phone or other devices while you enjoy the cool breeze.
- **Washable Fan Guard:** The fan guard can be easily taken off and washed to keep it clean and extend its life.
- **Powerful Motor:** It comes with a high-quality motor that can reach up to 4600RPM and let a lot of air flow through it quickly.
- **Portable Design:** The small, foldable design makes it easy to store in a bag or backpack, making it perfect for traveling.
- **LED Power Indicator:** The three LEDs show the battery level (100%, 60%, and 30%), making it easy to see how much charge is left.
- **Noise Level:** It only makes 31dB of noise, so it's great for use in offices, while napping, or in other quiet places.
- **Long Working Time:** It can be used continuously for 9 to 53 hours, based on the speed setting, so it will cool you all day.

- **USB Rechargeable:** You can easily charge it via USB from a number of different devices, such as power banks, car chargers, and regular wall plugs.

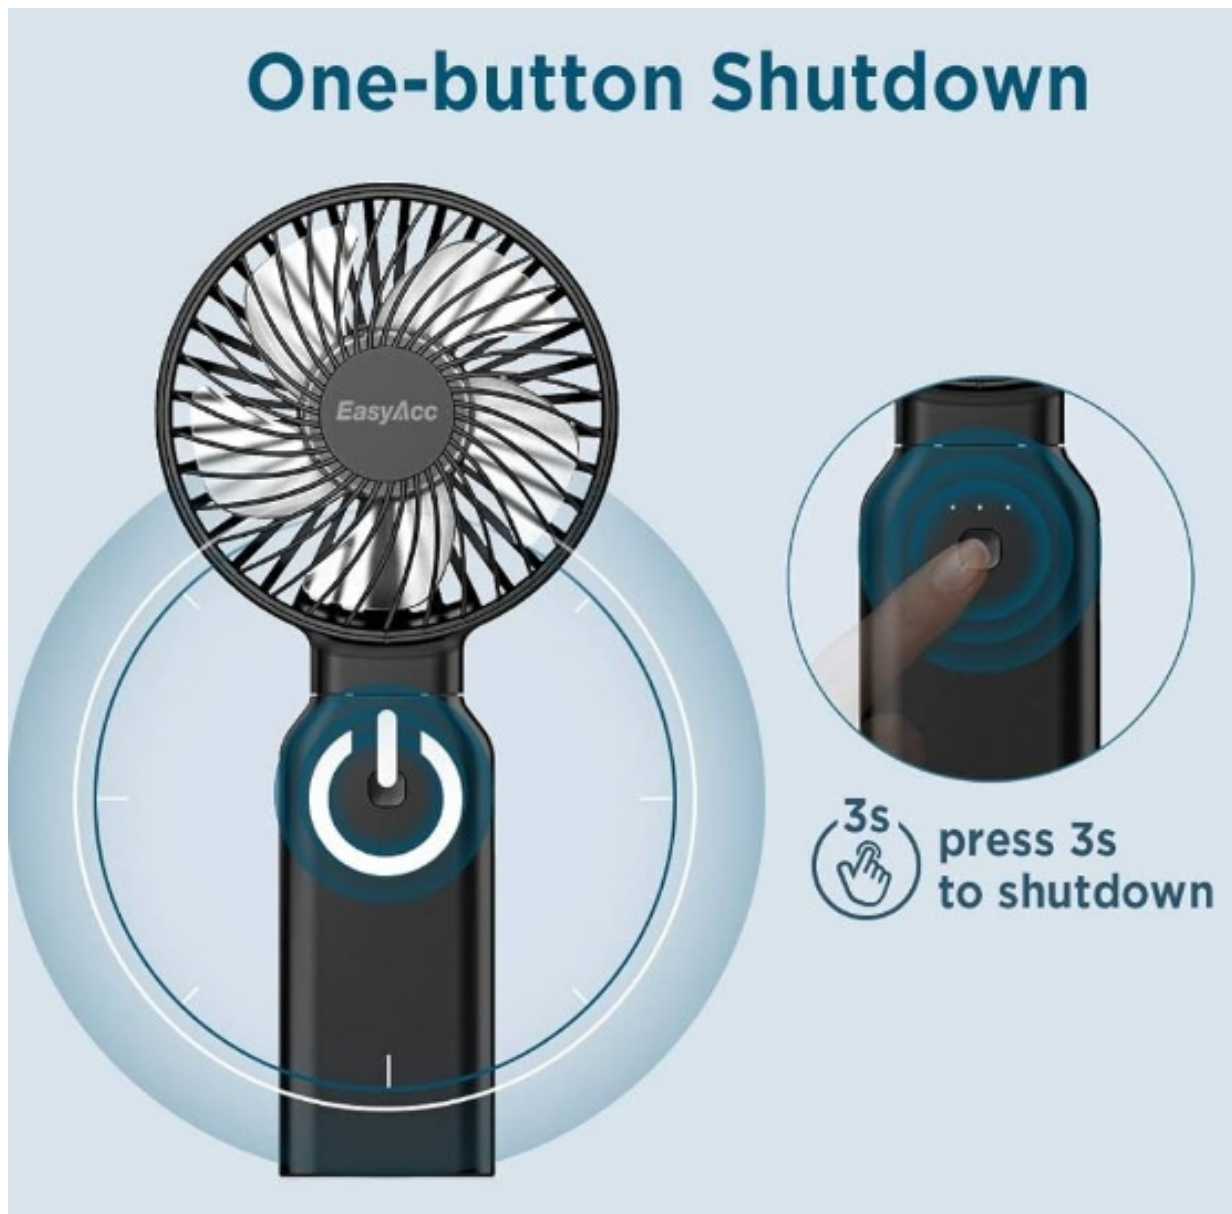

- **Effective Battery Charging:** The fan is always ready to use because it charges quickly (in 4 hours).
- **One-Touch Off:** To turn off the fan, press and hold the power button for three seconds. This makes the operation easy to use.
- **Durable ABS Construction:** It's made from high-quality ABS material, which makes it last longer when used regularly.
- The ergonomic design makes it easy to hold for long amounts of time, and the weight of only 0.37 kg makes it very portable.
- **Multiple Uses:** Great for picnics, shopping, camping, and other outdoor activities, and pets can even use it to stay cool.

## SETUP GUIDE

- **Unbox the Fan:** Take the fan and its parts out of the box.
- **Charging the Fan:** To charge the fan, use the USB cord that came with it. It can be charged or plugged into a USB port.
- **Check the Battery sign:** While the fan is charging, keep an eye on the three-LED sign to make sure it's

working right.

- **Take Off the Fan Guard:** To clean, turn the fan guard counterclockwise to put it back on and clockwise to take it off.
- **Start the Fan:** Press the power button to start the fan, which will then go through its 4-speed sets.

- **Pick a Speed:** Select the speed you want by pressing a button. There are 4 speeds to choose from.
- **Charging Reminder:** One LED light on the fan will let you know when the battery is low.
- **One-Touch Off:** Hold down the power button for three seconds to turn off the fan.
- To save room, fold the fan up so it's easy to put in your bag or backpack.
- The fan can run for 9 to 53 hours, based on how fast it is set. Watch through the LED lights.
- **Position the Fan:** Hold the fan in an easy way or put it on a flat surface to use it while you're not moving.
- **How to Use It as a Power Bank:** To charge a device, connect it to the fan's USB connection.
- Setting the fan to speeds 1 or 2 for use inside and speeds 3 or 4 for use outside is the best way to use it.
- **Keep the battery healthy** by not charging the fan too much. It shouldn't take more than 4 hours to charge the fan.
- **Be Careful When Moving:** To keep the fan from getting damaged during transport, fold it up and put it in a safe place.

## CARE & MAINTENANCE

- **Clean Often:** Take off and wash the fan guard every so often to keep dust from building up and extending the fan's life.
- **Don't Charge Too Much:** To keep the battery healthy, don't charge the fan for more than 4 hours.
- **Place to Store Cool:** When not in use, keep the fan somewhere cool and dry to protect it from damage caused by high or low temperatures.
- **Correct Charge:** To keep the internal battery from getting damaged, only use 5V/0.5A chargers to charge the fan.
- **Watch Out for Dust:** Use a soft brush or cloth to clean the fan blades and motor parts to get rid of dust.
- **Do not drop the fan.** Even though it is strong, big impacts can damage its parts. Be careful with it.
- **Use as directed:** Keep the fan away from water or too much wetness to keep the electricity from breaking down.
- **Check the Battery's Health:** If the fan's battery doesn't stay charged, look for signs of too much wear or think about getting a new one.
- **How to Store It During the Winter:** If you're not going to use the fan for a long time, keep it somewhere dry with the battery charged to 50%.
- **Charge Fully Before First Use :** To set up the battery, the fan should always be fully charged before its first use.
- **Do Not Block Airflow :** To keep things from getting too hot, make sure that nothing is in the way of the fan blades while they are running.
- **Use the Fan on a Flat Surface:** If you want to leave the fan alone, put it on a flat, stable surface.
- **Avoid Long-Term Direct Sun Exposure :** Too much sun can damage the plastic and internal parts.
- **Check for Function :** Press the power button often and make sure all the settings, including the speed modes, work as they should.
- **Replace Faulty Parts:** If the fan is broken or any of the parts aren't working right, call customer service to get new ones.

## TROUBLESHOOTING
