Product Usage Instructions

1. Connect the PS/2 Server Interface Unit to the PS/2 server using the provided cables.
2. Connect the other end of the interface unit to the B064-Series NetDirector KVM switch using Cat5e/6 cable.
3. Ensure the server and KVM switch are powered on.
4. You can now control the server through the KVM switch from a distance of up to 164 ft. (50 m.).

FAQ:

- Q: Can I use this unit with servers that have USB connections instead of PS/2?

  A: No, this unit is specifically designed for servers with PS/2 connections and may not work with servers that have USB connections.
- Q: Is there a maximum number of servers I can connect using this unit?

  A: The unit is designed to connect one server to a KVM switch. If you need to connect multiple servers, you will require additional Server Interface Units.

NetDirector PS/2 Server Interface Unit (B064- Series)
MODEL NUMBER: B055-001-PS2

Description

This PS/2 Server Interface Unit connects a server with PS/2 keyboard/mouse ports to a B064-Series NetDirector® KVM switch using Cat5e/6 cabling. Use of Cat5e/6 cables frees up space in server cabinets that would otherwise be filled by traditional, bulkier KVM cable kits. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.
Note: SIUs that were purchased prior to that of your KVM switch may require a firmware upgrade in order for them to work properly (see Maintenance under OSD Operation section in your B064-Series KVM Owner's Manual for details).
