Overview

The interface (write-read unit) is required to program the data loggers. This interface is connected to the PC and supplied with power from there by means of the universal Serial Bus (USB cable).

Unpacking/scope of delivery

Check the device packaging and contents to ensure it is complete and undamaged. If you have any reason for complaint, do not hesitate to contact us. You will find our contact data on the back of this manual. Scope of delivery The delivery includes these parts:

- This user manual
- Interface EBI 20-IF
- USB-cable
- Software “Winlog. basic”

Cleaning and maintenance

Clean the device with a slightly dampened cloth.

Never use solvents (such as acetone) for cleaning because these may attack the plastic.

Disposal

If the device becomes no longer fit for purpose, it must be disposed of in a suitable, environmentally-friendly manner.

Do not, under any circumstances, simply dispose of it in domestic garbage. You must return it to the manufacturer.

Dispose of the battery at the appropriate recycling point.

Approvals

The conformity certificate confirms that this product complies to CE guidelines 2014/30/EU.

Operation

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This device has been designed to operate with an internal antenna. Other Antennas are strictly prohibited for use with this device.

Changes or modifications of the device could void the user's authority to operate the equipment. (Exception: Replacing the battery as described in the user manual.) User manuals can be downloaded from the Internet at
